SELECT COMMITTEE ON CONSUMER CREDIT

Proceedings of hearings held at the
Parliament Buildings, Toronto, Ontario,
on the 26th day of October, 1964.

October 26, 1964

1 THE CHAIRMAN: Gentlemen, we have a
2 quorum so I will call the meeting to order.

3 This afternoon we are going to
4 hear from Mr. Ziegel, Associate Professor of Law,
5 University of Saskatchewan. Professor Ziegel was in
6 touch with us very shortly after the Committee was
7 originally set up and has been in touch with us off
8 and on ever since, trying to set a mutually satisfactory
9 date and it just happens that he was able to be with
10 us at this time and we welcome him here this afternoon.

11 He has put a lot of work into his
12 brief and we will just let him proceed in any way that
13 he would like to. Professor Ziegel.

14 MR. ZIEGEL: Thank you very much,
15 Mr. Chairman. With your permission, Mr. Chairman, and
16 honourable members, I would like to read at least part
17 of my brief, and then perhaps we can decide after a
18 while whether you would like me to read all of it or
19 whether you would prefer to put questions to me on
20 the points raised in the various parts that have been
21 read.

22 Mr. Chairman and honourable members
23 of the Committee: I feel privileged to have been
24 invited to appear before you today, and I hope that
25 my remarks may be of some assistance to you. In view
26 of my background, I felt that I could best be of
27 assistance to the Committee by presenting a short
28 historical and comparative survey of the retail instal-
29 ment sales legislation which has been adopted in the
30 other Provinces of Canada and in several non-Canadian

1 common law jurisdictions with a high volume of consumer
2 credit. For this purpose I have selected the United
3 States, the United Kingdom and Australia. Time does not
4 permit me to offer a detailed analysis of the legislative
5 provisions to which I shall refer, but I shall be only
6 too happy to answer questions and to enlarge upon any
7 point raised in my survey. I have made an exception
8 in the case of the disclosure problem, and my
9 comments on this topical subject appear in the form of
10 an Addendum to the survey. The reason for the exception
11 is that I know the Committee has been much exercised over
12 the problem and has received many briefs opposing a
13 compulsory "truth in lending" law. I believe these
14 criticisms can be answered, and in my Addendum I have
15 tried to do just that.

16 I might add, Mr. Chairman, my Addendum
17 appears at pages 31 to 36 of my brief.

18 Before I start my survey, a sketch of
19 the material problems which a legislature may have to
20 face may be helpful. These problems may be grouped
21 under six heads: (i) frank and full disclosures in the
22 written contract of the financial terms of the agreement
23 and elimination of false and deceptive advertisements;
24 (ii) maintenance of sound credit standards; (iii) regu-
25 lation of finance charges, including refinancing and
26 delinquency charges; (iv) exclusion of unfair clauses
27 from the agreement; (v) protection of the buyer's
28 equity in the goods in case of repossession by the seller;
29 and (vi) provisions for enforcing the Act.

30 Disclosure is necessary so that the

1 buyer may appreciate the financial commitments he is
2 undertaking and know the difference between the cash price
3 and the time price of the goods he is acquiring. A
4 further object is to instruct him in the components of
5 the time price, especially where, as in the case of an
6 automobile purchase, it frequently includes, apart from
7 the unpaid balance of the cash price and the finance
8 charge, items such as registration charges, property
9 damage insurance, and, increasingly, credit life
10 insurance. Furthermore, since the advertisement fre-
11 quently is the magnet which draws the buyer into the
12 ship, a misleading or false advertisement can do much
13 harm. Hence, for maximum effectiveness, the regulation
14 of such advertisements should also be brought within
15 the disclosure net.

16 Sound credit standards are needed
17 because of the fact that excessive zeal by some retailers,
18 and the attractions of being able to obtain immediate
19 use of desirable goods with only a small down payment,
20 may tempt buyers of modest means to overextend their
21 financial resources. The social consequences in such
22 cases can be very grave. Theoretically the financing
23 agency's policy may be to insist on a downpayment and on
24 the payment of subsequent instalments sufficiently
25 high to ensure that the value of the goods will, during
26 the life-time of the contract, exceed the unpaid balance
27 of the time price, but competitive pressures may compel
28 the financier to relax such sound credit standards. More-
29 over, the practice of traders granting over-generous trade-
30 in allowances may substantially dilute the value of any

1 downpayment. For all these reasons the Legislature
2 will have to consider whether the regulation of minimum
3 downpayments and maximum maturity rates may not be
4 necessary in the public interest.

5 Turning to finance charges, it is
6 widely conceded that the average consumer is not rate
7 conscious and that his principal interest is in the
8 size of the downpayment and monthly instalments he
9 will have to meet. Two consequences flow from these
10 facts. First, there is very little rate competition
11 among finance companies, and, secondly, some finance
12 charges, especially in the field of used vehicles, are
13 unconscionably high. The problem is accentuated by the
14 practice of some car dealers "packing" their charges.
15 There are two ways of coping with the problem, which
16 preferably should be used together. The first is to
17 regulate by law the maximum permissible charges, as
18 is already done, for example, in the case of small
19 loans. The other is to require every contract to
20 state the finance charge both in money terms and as an
21 effective rate of interest, so that the buyer may
22 readily be able to compare the rates of different finan-
23 cial institutions. If the first method is used, some
24 consideration will also have to be given to the
25 question of regulating the commissions paid by finance
26 companies to dealers, since these now comprise a very
27 substantial part of the total finance charge in the case
28 of automobile sales. Related to the question of
29 finance charges is the right of the buyer to a
30 proportionate rebate of the charge where he prepays or,

1 in the case of an acceleration clause, is forced
2 to prepay the whole or part of the unpaid balance
3 of the contract price. At common law he has no such
4 right. The same problem arises if, as happens
5 frequently, the contract is refinanced during its life-
6 time.

7 The interests of the consumer and
8 the finance company are violently at odds over
9 exclusionary or so called disclaimer clauses. The
10 company, which regards itself for this purpose as
11 essentially in the position of a lender of the purchase
12 price of the goods, feels that it is entitled to be
13 isolated from disputes between the buyer and the
14 seller. To this end a triple-barrelled weapon is
15 frequently used against the consumer. First, the
16 agreement excludes all warranties and conditions.

17 Mr. Chairman, attached to my brief
18 is a copy of a typical conditional sales contract
19 currently in use; I think it is fair to say by all
20 the companies in the sales finance field and if you
21 will turn to page 2 of that agreement, which is
22 really the reverse side of the original agreement,
23 you will find that I have put a little pencil mark
24 beside paragraph 5 and paragraph 6. That is right
25 at the end of my brief. You will find that page 1
26 of the agreement is headed "Conditional Sales Contract".
27 Now on page 2 of that agreement, paragraph 5, is the
28 paragraph that contains what is generally referred to
29 as an exclusionary or disclaimer clause. Now, paragraph
30 5 here reads as follows: "Purchaser acknowledges that

1 this agreement constitutes the entire contract. There
2 are no representation, warranties or conditions
3 expressed or implied, statutory or otherwise, other
4 than as contained herein."

5 Perhaps I should add, Mr. Chairman,
6 for the benefit of any members of the Committee who
7 may not be lawyers that ordinarily, if a buyer
8 purchases goods, the Sale of Goods Act implies in his
9 favour a number of implied conditions of warranties
10 regarding what we call the merchantability of the
11 goods and their fitness for the purpose for which
12 they are bought. Now the effect of this paragraph 5
13 is to try and exclude those implied conditions which
14 are ordinarily implied in favour of the purchaser.

15 If I may now continue with page 4
16 of my brief, Mr. Chairman. I have so far enumerated
17 the first of three references that are used in these
18 agreements to protect the finance company against
19 buyer-dealer disputes.

20 The second means used is that the
21 buyer is made to agree that any assignee of the
22 agreement shall take it free of all defences. Now
23 this clause, Mr. Chairman, is found in paragraph 6 of
24 the assessment form of agreement, that is, immediately
25 after the clause dealing with exclusionary clauses.
26 The first part of that reads as follows: "Purchaser
27 takes notice that this agreement, together with the
28 vendor's title to property and ownership of said goods
29 and said note (that refers to the promissory note) are
30 to be forthwith assigned and negotiated by Vendor to

1 Industrial Acceptance Corporation Limited, and that said
2 Corporation shall be entitled to all of the rights of
3 Vendor free from all equities existing between Vendor
4 and Purchaser."

5 Now, the practical effect of that
6 clause, Mr. Chairman, is this; that the general rule
7 of law which provides where a person assigns his right
8 to a debt to a third person, that third person has
9 no better rights against the debtor than the original
10 creditor had. This is a dispute between the debtor and
11 the creditor, say, regarding the condition of the
12 goods, the debtor will be free to raise this defence
13 in any claim by the assignee of that debt. Paragraph
14 6 attempts to eliminate this possibility. However, in
15 Ontario, as in a number of other Provinces, this
16 clause has been the subject of frequent litigation
17 before the Courts and its present status is somewhat
18 clouded at the moment.

19 Now the third weapon that is generally
20 used, Mr. Chairman, to isolate the finance company
21 from buyer-trader disputes is a promissory note, with
22 the implications of a holder in due course status for
23 any bona fide endorsee, which usually accompanies the
24 agreement. The endorser of a promissory note, Mr.
25 Chairman, is ordinarily entitled to sue on the note
26 regardless of any disputes between the original parties
27 to the note and this, of course, is the reason why
28 finance companies do usually take a promissory note
29 in addition to the assignment of the conditional sale
30 agreement. Members of the Committee may perhaps

1 remember that two or three years ago a house improvement
2 company in Ontario was going around offering to improve
3 people's homes and then persuading the home owner to
4 sign a promissory note for the cost of the job before
5 the job had been done. Those notes were then
6 assigned to various financial agencies who in due course
7 called upon the house owners who honoured the promissory
8 notes and when the house owner tried to raise the
9 defence that the work in respect of which the note
10 had been signed had never been done. Great difficulties
11 arose on the part of the house owner because under
12 the ordinary law of negotiable instruments this would
13 not have been a defence against the bona fide endorsee
14 of that note. So this is the practical significance
15 of promissory notes in the consumer credit field.

16 So, Mr. Chairman, these are the
17 three means that are generally used in practice by
18 finance companies to isolate themselves from these
19 dealer-buyer disputes.

20 Now the consumer interest, in my
21 opinion, is not to be compelled to pay for goods which
22 are faulty, or have been misrepresented, or perhaps have
23 never even been delivered to him at all. While the
24 common law, in some instances, has been able to save
25 some of the rights which the buyer has thus unwittingly
26 signed away, the protection is far from adequate or
27 complete; consequently, once again, the legislature must
28 intervene. The importance of this problem cannot be
29 overemphasized.

30 Protection of the buyer's equity when

1 the seller repossesses the goods is historically the
2 oldest problem and the one which has received the
3 earliest statutory attention. Repossessions (including
4 the voluntary return of goods) may represent as much
5 as 10 per cent of the total number of contracts
6 liquidated per annum in the case of used vehicles, and
7 as much as 5 - 6 per cent in the case of new vehicles.

8 I might add, Mr. Chairman, these
9 figures were given to me by a former President of the
10 Federated Council of Sales Finance Companies. That
11 the buyer in default should not summarily forfeit his
12 equity is almost everywhere conceded but the extent to
13 which it should be protected is susceptible to different
14 answers. Some of the policy questions which arise are
15 the following. Should the buyer, loke a mortgagor,
16 simply have a right to redeem the goods on paying the
17 unpaid balance of the purchase price, or should he
18 have an opportunity to reinstate the agreement by
19 paying the instalments actually in arrears, exclusive
20 of any acceleration clause?

21 I might add, Mr. Chairman, if I
22 remember correctly, in Ontario, in the cases of
23 mortgages on real property, that right is expressly
24 conferred on the mortgagor by the Court. However, there
25 is no similar right, in Ontario, with respect to
26 mortgages against goods.

27 Should the seller be required to
28 obtain a court order before repossessing and, upon
29 such an application being made, should the court be
30 empowered to stay repossession proceedings upon such

1 terms as it sees fit? And again, should there be a
2 compulsory resale in all cases and should the seller
3 be entitled to claim any deficiency after a resale?

4 Finally, there is the question of the
5 most effective method of enforcing the Act. The choice
6 here lies between penal sanctions, civil penalties,
7 and a licensing system, or all three. Weak sanctions
8 do not deter and excessive penalties may deter too much;
9 hence a well drafted act must show a proper sense of
10 discrimination and adjust the sanctions in accordance
11 with the gravity of the particular offence. With
12 these preliminary remarks, I should now like to review
13 the legislative history of the four countries which I
14 have chosen for this purpose.

15 Turning first to Canada. Early
16 conditional sellers found the common law greatly favoured
17 their enterprise. On the one hand, by a conjunction
18 of the principle that a person cannot transfer a better
19 title to goods than he himself has and the rule that the
20 passing of title may be postponed for as long as the
21 parties may agree, they were able to maintain their
22 proprietary position even though the buyer was left in
23 possession of the goods. On the other hand, because
24 in law the transaction was, and in Canada still is, only
25 an executory agreement of sale, and not a chattel
26 mortgage, they were able to avoid the registration
27 requirements of the emerging bills of sale Acts as well
28 as the fetters which equity places on a mortgagee seeking
29 to foreclose. These advantages, however, did not
30 survive for long. Between 1882 and 1907 all the

1 provinces and territories adopted some form of legis-
2 lation requiring registration of the conditional sale
3 agreement or the marking of the goods with the seller's
4 name, and, except in the case of Manitoba, conferring upon
5 the buyer a right to redeem following repossession by the
6 seller. It was further provided that if the seller
7 intended to look to the buyer for any deficiency after
8 a resale he was to give him notice of his intention to
9 sell, together with certain other specified details.
10 This requirement was, and still is, strictly interpreted,
11 and it was early held that imperfect compliance
12 deprived the seller of the right to sue for any part
13 of the deficiency. Consequently, since a technical
14 error in the contents of the notice to be sent to the
15 buyer is all too easy, the defaulting buyer often
16 received, and still receives, a windfall that is as
17 unexpected as it is unjust. Another laudable, but
18 ineffectual, requirement of these early Acts was that
19 the buyer was entitled to receive a copy of the
20 contract within a specified time after its conclusion;
21 but, since non-compliance only exposed the seller to a
22 nominal fine, it could never have been of great
23 practical importance.

24 Mr. Chairman, I am not aware of any
25 case in which prosecution has ever been launched against
26 the seller for failing to provide the buyer with a copy
27 of the contract within the specified time.

28 These provisions were modified in
29 only minor respects in later years; they were adopted
30 almost verbatim in the first Uniform Conditional Sales

1 Act of 1922 and repeated in the subsequent revised
2 uniform acts of 1947 and 1955; and they are in force
3 today in most of the provinces. Although Ontario has
4 never adopted any of the versions of the uniform act,
5 the provisions in the Ontario Conditional Sales Act
6 concerning the repossession and resale of goods are
7 very similar to those in the uniform act.

8 While the draftsmen of these statutes
9 deserve great credit for appreciating so early the
10 need to shore up the unequal bargaining position of
11 the buyer, it must also be admitted that the
12 redemption and foreclosure provisions fall far short of
13 what is required for the protection of the buyer.
14 First, these provisions do not require the seller to
15 give the buyer any warning before repossessing the
16 goods. In practice, Mr. Chairman, the finance companies,
17 too, usually give the buyer ample warning. But it is
18 not a requirement that they are required to comply with
19 by law.

20 Secondly, they do not entitle the
21 buyer to reinstate the contract upon paying the amount
22 actually in arrears before the goods were repossessed;
23 and, thirdly, they do not require the seller to re-sell
24 the goods for the benefit of the buyer, even though the
25 buyer has a substantial equity in the goods.

26 To resume my narrative, the next
27 development of consequence was in the limited but, for
28 the provinces concerned, economically important field
29 of farm implements. With respect to such chattels, the
30 prairie provinces of Alberta, Saskatchewan, and Manitoba

1 enacted special legislation in 1913, 1915, and 1919.
2 Much farm machinery which was being sold at the time
3 was of an experimental character and not functioning
4 satisfactorily, and farmers generally were being
5 over-reached by harsh contractual provisions. These
6 Farm Implements Acts were designed to remedy that
7 situation. The Saskatchewan Act was, and still is,
8 the most comprehensive of the three, and the ensuing
9 remarks are accordingly based upon its provisions.

10 Every vendor of farm machinery must be
11 licensed, and his books and premises may be inspected
12 by inspectors appointed under the Act. Every contract
13 is required to be in writing in one of the two forms
14 prescribed by the statute, and no contract is binding
15 upon the buyer until a copy of it has been delivered
16 to him. The prescribed forms, in conjunction with
17 several sections of the Act, set out the rights and
18 duties of the parties, and may not be varied or excluded.
19 In the case of new implements the seller is expressly
20 required to warrant their fitness, and he is liable for
21 his agent's representations. The manufacturer is also
22 liable on the statutory warranties, even though he is
23 not a party to the contract.

24 This I might add, Mr. Chairman; I
25 think it is a unique provision in Canadian statute law
26 and an interesting anticipation of current developments.

27 The Act contains specific provisions,
28 in the case of "large implements", laying down the
29 procedure for adjusting the parties' rights following
30 repossession by the seller. Moreover, in all cases of

1 repossession and resale the buyer is entitled to any
2 surplus and, it would seem, liable for any deficiency.
3 Finally, the Act establishes an Agricultural Machinery
4 Board which, together with the Agricultural Machinery
5 Administration, a government agency, is responsible
6 for administering the statute and issuing regulations
7 under it.

8 Perhaps I may be permitted to add, Mr
9 Chairman, that none of this legislation was political
10 in character, certainly the Saskatchewan legislation
11 much preceded the first CCM government in the province.

12 Even allowing for the fact that the
13 Farm Implements Act was designed to meet a special situ-
14 ation, it is still a remarkable example of an early
15 piece of legislation containing many of the features which
16 competent observers today regard as essential for the
17 safeguarding of consumer interests in instalment
18 sales. It introduces a statutory form of agreement,
19 thereby automatically eliminating the oppressive con-
20 tractual provisions. It further regulates the parties'
21 rights and duties - insofar as they are not already set
22 forth in the statutory agreement - and in particular
23 it prescribes when the seller may repossess and how he
24 must proceed after repossession: thus the buyer's equity
25 in the goods is carefully protected. Finally, to
26 ensure that the statute is being observed, there are
27 comprehensive licensing provisions with real bite in
28 them.

29 Contemporaneous with the farm legis-
30 lation was Alberta's decision to regulate the extra-

1 judicial seizure of goods, including goods repossessed
2 under a conditional sale agreement. The original Act of
3 1914 empowered only a sheriff or other person
4 authorized by him to seize such goods, and provided
5 that after seizure the goods were not to be sold
6 except upon the order of a judge "granted ... after
7 consideration of all the facts and circumstances and
8 upon such terms and conditions as to costs and otherwise
9 as he shall determine." These provisions were completely
10 revised in 1929, and the position is now as follows:

11 These provisions, Mr. Chairman, will
12 be found in the Alberta extra-judicial Seizures Act
13 usually referred to as the Seizures Act.

14 At the time of seizure the sheriff
15 must leave with the debtor a "Notice of Seizure". The
16 debtor can serve a notice of objection to the seizure
17 within fourteen days, and if he does so the onus is
18 cast upon the seller to apply to the court for an
19 order authorizing the property's removal and sale.
20 The court may deal with the application in a variety of
21 ways, but from the buyer's point of view the most
22 important one undoubtedly is the power to suspend any
23 order for sale pending payment of the debt by such
24 instalments or the performance of such other conditions
25 as the court may determine. It may be noted that this
26 provision fully anticipates the similar powers conferred
27 upon the English county courts under section 12 of the
28 English Hire-Purchase Act of 1938. If no notice of
29 objection has been served, the seller is entitled to
30 proceed with the seizure and sale, but he is required

1 to notify the buyer beforehand of the intended sale.
2 Furthermore, if the buyer states in writing to the
3 sheriff that the value of the goods exceeds the amount
4 of the seller's claim, they may not be sold without
5 the sheriff's consent. Finally, after the sale the
6 seller must file a statutory declaration with the
7 sheriff giving particulars of the amount realized and
8 pay over the surplus, if any.

9 Until 1942, however, Alberta did not
10 interfere with the seller's right to recover any
11 deficiency following repossession and sale. An
12 amendment to the Conditional Sales Act adopted in that
13 year thereafter deprived him of the right by forcing
14 him to elect between suing for the balance of the
15 purchase price or repossessing. Why the amendment was
16 introduced at this particular time is not clear. It
17 appears, however, to have its emotional roots in a
18 feeling fostered during the Depression that "it is not
19 exactly fair that a man should be required to pay the
20 full price for goods he doesn't get to keep." Of course
21 there is a fallacy in this reasoning, Mr. Chairman,
22 because that the seller repossesses are not, of course,
23 new goods, they are used goods so that really the
24 seller suing for deficiency gets no more ultimately
25 than the purchase price of the goods.

26 Whatever the merits of this argument,
27 it is significant that similar provisions have now been
28 adopted in Quebec, Newfoundland, and the Northwest
29 Territories. We now have four jurisdictions in Canada
30 that compel the seller to elect between suing for the

1 price or repossessing the goods.

2 I must now return to Saskatchewan.

3 This province, even more than Alberta, has seriously
4 curtailed the seller's rights and correspondingly
5 strengthened the buyer's position. The new movement --
6 not restricted to farm machinery -- began in 1933 with
7 a provision in the Limitation of Civil Rights Act
8 restricting the seller's rights to his lien on the
9 goods; in other words, he cannot sue for the purchase
10 price at all. This amendment was recommended by a
11 Select Special Committee of the Saskatchewan legislature
12 in 1932. In 1939 and 1940 amendments were introduced
13 concerning implied warranties and conditions, and
14 empowering the court, on the buyer's application, to
15 stay any intended repossession by the seller. These
16 were no doubt inspired by the comparable provisions in
17 the English Hire-Purchase Act, although the two are not
18 identical. In particular, it should be noted that the
19 power of the Saskatchewan courts to stay repossession
20 proceedings is limited to specified items of goods;
21 on the other hand, the buyer need not have paid a
22 minimum amount before he can invoke the court's
23 jurisdiction (as is the case in the English Act), nor is
24 there any ceiling on the purchase price of the goods to
25 which the sections apply. Further amendments making
26 acceleration clauses substantially inoperative were
27 adopted in 1958.

28 Thus it will be seen that the
29 unconscionable seller (and, sometimes, the conscientious
30 one, too) faces formidable hurdles in both Saskatchewan

1 and Alberta. There have been attempts to challenge
2 the legislation on constitutional grounds, the
3 argument being that it trenches upon the exclusive
4 federal power to legislate on matters of banking and
5 bills of exchange, but they have not succeeded.

6 I might add, Mr. Chairman, I have
7 frequently inquired of finance companies and retail
8 dealers operating in these Provinces whether this
9 restrictive legislation has seriously affected the
10 volume of sales in these provinces and they have
11 always assured me that it hasn't. They don't like
12 the legislation but on the other hand it doesn't seem
13 to have materially affected credit sales in these
14 provinces. Possibly the most important influence
15 that it does have is to make retailers a little more
16 careful before extending credit, knowing that they
17 will have difficulty in suing for any deficiency, if
18 indeed they have that right at all, they are going to
19 be doubly careful before extending the credit.

20 The legislation which has been described
21 thus far, with the exception of the farm implements
22 Acts, deals primarily with enforcing the seller's rights
23 and terminating the contract. Attempts to control the
24 activities of finance companies and retailers more
25 directly, and to regulate the financial terms of the
26 contract, began to be enacted in other provinces from
27 1938 onwards. Nova Scotia introduced a somewhat ambiguous
28 licensing statute in that year, but it does not appear
29 to be of much importance at the present time. It was
30 apparently adopted because of a number of pre-war

1 complaints about arbitrary repossession practices by
2 some sellers. The Act requires every dealer engaging
3 in conditional sales and every sales finance company to
4 be licensed, and vests in the Minister of Municipal
5 Affairs, who is the licensing authority, the right
6 to cancel or suspend any license at any time "in his
7 absolute discretion". He may also appoint inspectors
8 to examine retailers' books. No licenses, however,
9 have been refused, cancelled, or suspended since 1950.
10 Newfoundland has also recently adopted a licensing
11 statute, this was in 1961, Mr. Chairman, but its
12 purpose appears to be to protect investors rather
13 than consumers.

14 Of far greater interest as a
15 precedent for possible future legislation is the
16 federal Small Loans Act, which was adopted in 1939.
17 Based on the sixth draft of a model act sponsored by the
18 Russell Sage Foundation in the United States, it
19 contains features which competent observers also
20 believe necessary for the protection of the purchase-
21 credit consumer. These are: (i) strict licensing
22 requirements coupled with far-reaching duties and powers
23 of inspection on the part of the Superintendent of
24 Small Loans, and an obligation on every licensee to make
25 annual returns; (ii) regulation of the maximum
26 permissible rates of interest which, since 1956, have
27 been set on a sliding scale and include every other
28 possible charge, with the exception of credit life
29 insurance; (iii) the borrower's right to pay off the
30 loan at any time without bonus or extra charge, and the

1 requirement that the loan must be repayable at
2 approximately monthly intervals; and, (iv) regulation
3 of delinquency charges. Both the Act and its
4 administration have been conspicuously successful, as
5 may be seen from the admirable annual reports issued
6 by the Superintendent of Small Loans and the apparent
7 absence of any reported litigation involving small
8 loans.

9 The federal statute may also have
10 influenced the draftsmen of the Quebec Instalment
11 Sales Act of 1947, which added Articles 1561a to 1561j
12 to the Code Civil. Quebec too, as a civil law province,
13 has long recognized conditional sales, but made no
14 attempt to regulate them until this Act. The Act was
15 apparently proleptic in character and was designed,
16 on a provincial level, to control instalment sales in
17 the interests of consumers of modest means following
18 the contemporaneous repeal of the federal wartime price
19 regulations. What is perhaps even more striking, in
20 view of the statute's far-reaching restrictions, is
21 the fact that the Quebec business community is said
22 to have given the bill its full support.

23 Subject to two exceptions, the Quebec
24 statute only applies to retail sales not exceeding eight
25 hundred dollars. Also excluded are a wide range of
26 goods, including motor vehicles. But within these limits
27 the Act regulates instalment sales more comprehensively
28 than either the Saskatchewan or the Alberta legislation.
29 Thus it prescribes a minimum down-payment of fifteen
30 per cent and a sliding scale of maximum maturity periods.

1 Deferred payments must of an equal amount, with the
2 exception of the last one, which may be for a smaller
3 amount, and the buyer is given a right of prepayment
4 both as to single payments and of the whole unpaid
5 balance. In such cases he is entitled to a rebate of
6 nine per cent per annum of the instalment or balance
7 which is prepaid. A maximum finance charge of $3/4$ of
8 1 per cent only for each month of the duration of the
9 agreement is permitted. There are compulsory disclosure
10 requirements concerning the regular cash price, the
11 time price, the down-payment, and the instalments, and
12 the written contract as a whole must follow the form
13 prescribed in a schedule to the Act, all changes or
14 additions not compatible with the Act being declared
15 null and void. As in the Alberta Act, so here, the
16 seller is put to his election if the buyer is in
17 default: He may either sue for the unpaid instalments
18 or retake possession of the goods and retain any
19 payments which have been made. If he elects the latter
20 course the buyer is released from all further liability
21 for the balance of the price, but he or his creditors
22 may redeem the goods within twenty days of repossession.
23 Non-compliance with the disclosure, down-payment, rate,
24 rebate and form of contract requirements apparently de-
25 prives the seller of his title to the goods. It may
26 be questioned, however, whether this sanction is as
27 effective as the one more commonly found in the American
28 statute, namely, depriving the seller of the right to
29 recover any part of the finance charge.

30 Influenced by the Quebec precedent,

1 New Brunswick also tried a shortlived experiment in
2 controlling the terms and duration of retail instalment
3 sales. These provisions were introduced in 1949, and
4 while they were in force called, like the Quebec statute,
5 for a minimum down-payment of fifteen per cent and a
6 maximum maturity rate of twenty-four months. Excluded
7 again were a wide range of goods, but not motor
8 vehicles. The restrictions were found to be difficult
9 to administer and enforce, and they were accordingly
10 repealed in 1959.

11 In conclusion, brief reference should
12 also be made to the legislative attempts which have
13 been made in Canada since the end of the war to
14 compel disclosure of the finance charge in terms of a
15 percentage rate. (I am intentionally avoiding the
16 use of the term "interest rate", Mr. Chairman, for
17 reasons which are explained in my Addendum). As I have
18 already indicated, Quebec adopted disclosure requirements
19 as early as 1947, but these provisions only require
20 disclosure of the finance charge in dollars and cents.
21 Since then Alberta and Manitoba have also adopted
22 disclosure Acts, the first in 1954 and the second in
23 1962. The Alberta Act was amended last year and now
24 requires the finance charge to be expressed as a
25 percentage rate. However, this part of the amending
26 Act has not yet come into force. The original Manitoba
27 Act also contained similar provisions, but these were
28 deleted in an amending Act of 1963 -- deleted, I under-
29 stand, Mr. Chairman, because they were so vigorously
30 opposed by the business community. A striking omission

1 in both Acts is that they do not require a copy of the
2 agreement containing the prescribed particulars to be
3 supplied to the buyer at any time. (The whole object
4 of the disclosure requirement is that the buyer be
5 given a copy of the agreement at the time he signs it.)
6 The Committee is, of course, familiar with Senator
7 Croll's Bill and its subsequent history, and I need
8 not therefore enlarge on it.

9 From the foregoing review it will be
10 seen that the existing conditional sales and retail
11 instalment sales legislation in Canada is both varied
12 and, in some respects, distinctive. Using as our
13 yardstick the six heads enunciated at the beginning of
14 this brief, the position with respect to each of them
15 may be summarized as follows: Three provinces have
16 disclosure requirements, but only one, Quebec, attempts
17 to regulate minimum downpayments and maximum maturity
18 rates directly. Alberta and Saskatchewan, however, in
19 a very real, if heterodox, way do so indirectly, in so
20 far as they eliminate the seller's right to sue for any
21 deficiency after repossession. This factor is bound
22 to make retailers more careful in extending credit.
23 Quebec, again, is so far the only province which has
24 shown any appreciation of the importance of prohibiting
25 excessive finance charges; but in view of the limited
26 coverage of the Quebec Act, the seemingly arbitrary
27 way in which the maximum permissible rate has been
28 arrived at, and the failure to relate it either to the
29 amount financed or to the length of the contract, its
30 provisions on this point are more important for the

1 principle they establish than for the manner in which
2 they apply it. Its rebate provisions are significant
3 for the same reason. Two provinces, Saskatchewan and
4 Quebec, have made serious attempts to protect the
5 buyer from oppressive contractual clauses, and the
6 precedent they have established of permitting only a
7 statutory form of agreement is most valuable, since it
8 automatically solves the problem of disclaimer clauses.

9 I might add, Mr. Chairman, that the
10 notion of a statutory form of agreement is not new in
11 Canada. It was adopted, I believe, as early as the
12 first world war, with respect to contracts of insurance.
13 There it has worked, I think, very satisfactorily both
14 from the point of view of the insured and the point of
15 view of the insurer.

16 Neither province directly prohibits the
17 taking of promissory notes, but this is the indirect
18 effect of section 18 of the Saskatchewan Limitation of
19 Civil Rights Act, as shown by Traders Finance Corp. v.
20 Casselman, (1960), 22 D.L.R. (2d) 177 (Supreme Court
21 of Canada). I might add, Mr. Chairman, the court there
22 held that where a finance company knows it was given
23 the respect to a Saskatchewan contract, the finance
24 company could not sue on a promissory note. So it was
25 restricted to the same remedies that the seller had
26 under the Act.

27 However, must more attention deserves
28 to be focused on the increasingly urgent problem of
29 promissory notes and "cut-off" clauses.

30 All of the provinces have some pro-

1 visions protecting the buyer's equity, but those in
2 force in the provinces other than Alberta, Saskatchewan,
3 and Quebec have only a limited value. When the buyer
4 cannot keep up his instalments, it is not likely that
5 he will be able to raise the balance of the purchase
6 price in order to redeem the goods after they have been
7 repossessed. Hence the Saskatchewan and Quebec Acts are
8 much more realistic in permitting the buyer to reinstate
9 the agreement on simply paying the instalments which are
10 in arrears. Best of all, however, are the powers of
11 staying repossession proceedings and re-adjusting the
12 time and amount of the payments which the Alberta and
13 (though in an unduly restricted class of cases) the
14 Saskatchewan provisions confer on the courts.

15 If, for the reason explained, the
16 recent Newfoundland Act is ignored, Nova Scotia alone
17 has licensing requirements, but here again their main
18 value lies in the principle they establish. Experience
19 under the Small Loans Act proves how effective such
20 provisions are as a deterrent against unlawful
21 practices and as a means of maintaining a high standard
22 of conduct among licensees. A well drawn Act and the
23 regular exercise of inspection powers are, however,
24 essential prerequisites.

25 Three final points deserve brief
26 mention. The first is that, of the three provinces with
27 any considerable amount of consumer legislation, only
28 the Quebec Act has a limited coverage. The Alberta and
29 Saskatchewan provisions, with minor exceptions, apply
30 to all instalment sales. This is in striking contrast

1 to the American retail instalment sales legislation which
2 is usually confined either to motor vehicles, or to
3 consumer goods, or to sales not above a certain price.

4 The reasoning behind this limited
5 coverage is, of course, Mr. Chairman, that it is only
6 the consumer -- that is the person who is not in
7 business -- who is entitled to special protection.

8 The other point concerns the almost
9 total absence of any protective legislation in the
10 provinces other than Alberta, Saskatchewan, Quebec and
11 Newfoundland. The omission is particularly striking
12 in the case of Ontario, which is after all the Province
13 with the highest volume of consumer credit in Canada.

14 Finally, it will be noted that almost
15 all the legislation involves conditional sales and not
16 other forms of consumer credit. This is readily
17 explicable. Until recently, and with the exception of
18 direct loans (which are of course governed by the
19 federal Small Loans and Bank Acts), the bulk of consumer
20 credit assumed the form of conditional sales. Moreover,
21 it is in this area that the majority of problems arise.
22 The amounts involved in the case of unsecured credit
23 are usually much smaller and it is only where the debt
24 is secured by some title-retaining device that
25 foreclosure problems and deficiency claims arise. All
26 forms of consumer credit, however, raise disclosure
27 issues and the desirability of regulating finance
28 charges, and future legislation must take this fact into
29 consideration.

30 May I ask, Mr. Chairman, would you like

1 me to continue reading my brief?

2 THE CHAIRMAN: Well, it's entirely
3 up to you, whichever you prefer.

4 MR. SEDGWICK: I have glanced over
5 it and I certainly think the Committee would want to
6 hear it and his Addendum. I think it answers many
7 questions.

8 MR. ZIEGEL: I would be very happy
9 to do that, Mr. Chairman.

10 Might I, before I move over
11 to my Addendum -- that's on pages 28 to 29 -- I set
12 forth a list of the current Canadian Provincial
13 Statutes dealing with consumer credit. I thought the
14 Committee would not wish me to quote actual sections
15 of legislation to them, but if any of the Committee's
16 staff would like to follow the matter up, I thought
17 this table would facilitate matters.

18 MR. LAWRENCE: Inaudible.

19 THE CHAIRMAN: Does any member want
20 to ask Mr. Ziegel any questions?

21 MR. LAWRENCE: I was wondering -- you
22 didn't cover it -- and I was wondering if Saskatchewan
23 had passed legislation on the practice which is growing
24 here in Ontario, particularly in the north country, and
25 that is the assignment of wages. You don't cover this.

26 MR. ZIEGEL: As far as I know it has
27 not been done on any extensive scale so far, but I
28 certainly agree with you that it is an important problem.
29 I believe it has been dealt with in an increasing number
30 of American jurisdictions.

1 MR. LAWRENCE: You mean prohibited?

2 MR. ZIEGE: Practically, yes.

3 MR. LAWRENCE: Is there any Canadian
4 legislation prohibiting it, do you know?

5 MR. ZIEGEL: Is there not an Ontario
6 Assignment of Wages Act?

7 MR. SEDGWICK: My recollection is yes.

8 MR. ZIEGEL: Well, apart from that
9 I don't know of any other legislation. Certainly there
10 is nothing in the federal Small Loans Act that prohibits
11 this. I think the reason is that this is a fairly new
12 phenomenon in Canada. It has been very common in the
13 States for many years, therefore it attracted much
14 earlier attention down there, than up here.

15 THE CHAIRMAN: Any other questions?

16 MR. SEDGWICK: I was just going to
17 ask one question about the same thing, so I shall ask
18 it now. My understanding from some inquiries I made
19 in England is that that type of assignment is virtually
20 unknown there and that also, and this is a matter that
21 was raised here, we have had examples where the seller
22 of an article --(rest of sentence inaudible). You don't
23 deal with that at all, do you?

24 MR. ZIEGEL: I deal with it in con-
25 nection with English legislation, Mr. Chairman. Perhaps
26 I may briefly resume the English legislation --

27 MR. SEDGWICK: Well, I understood that
28 it was not a practice --

29 MR. ZIEGEL: Not assignment of wages,
30 no, but they have some difficulties with what, in the

1 trade, is referred to as add-on or tie-on agreements.
2 That is dealt with in the 1938 Hire-Purchase Act which,
3 in fact, prohibits such tie-in or add-on clauses. In
4 other words, if you have paid for one article the title
5 moves to you regardless of whether you purchase goods
6 subsequently or not.

7 MR. SEDGWICK: Yes. And once, of
8 course, you have acquired title, this as a hire-purchase
9 system would require a completely different kind of deal
10 in order to bring anything back in, wouldn't it?

11 MR. ZIEGEL: Well, you would need some
12 sort of mortgage agreement -- but they are very unusual
13 in England because their Bills of Sale legislation is
14 certainly unpopular because of its very difficult formal
15 requirements.

16 MR. LAWRENCE: I would like to have
17 your views sometime -- I think this is especially in
18 Ontario -- on how this form could be controlled as well --
19 taking the general assignment of wages. My information
20 is it is growing here in Ontario.

21 MR. ZIEGEL: I entirely agree with you.
22 I think the small loans companies in particular are
23 increasingly going to it. If you want my personal
24 emotional reaction, I might say that I dislike the
25 practice intensely. I think its frequent result is to
26 lead to a man's loss of his job.

27 MR. LAWRENCE: Very much so.

28 MR. ZIEGEL: If I may inject a purely
29 personal tone -- I had occasion to visit a brewery
30 up in Prince Albert last year and as I went through the

1 premises I couldn't help seeing a large notice on the
2 employee's notice board which said the employees are
3 advised that if they are served with any further
4 assignment of wages or garnishee notices the employees
5 unquestionably will be discharged. I mean, that's a
6 very typical reaction of an employer, so I think such
7 assignments are, from a social point of view, are very
8 undesirable.

9 MR. LAWRENCE: The other question I
10 wanted to ask you: Is the Quebec Act, in setting the
11 maximum permissible rate -- has this ever been attacked?

12 MR. ZIEGEL: Not so far, no. Well, I
13 think in the light of the Supreme Court decision in
14 the Bothwick case, I think it must be held constitutional
15 because from a point of law an add-on rate is not treated
16 as interest. This is all doctrine of a time-price
17 differential. You are merely setting a higher price
18 for the privilege of being able to pay for the goods
19 over a period of time rather than by cash. As I read
20 the Supreme Court of Canada decision in the Bothwick
21 case -- and there are many more decisions along the
22 same line -- that is not regarded as interest for legal
23 purposes.

24 MR. LAWRENCE: Your final comment was
25 you mentioned that the Ontario Court had intervened in
26 regard to the mortgage situation in allowing -- where
27 there has not been a final order for foreclosure -- if
28 they pay up the arrears. I think this is an amendment
29 to the Mortgages Act. We passed it here about four years
30 ago.

1 MR. ZIEGEL: Thank you very much.

2 MR. IRWIN: Mr. Chairman, another
3 question along with Mr. Lawrence's -- it seems to me
4 it has been suggested here before the Committee that
5 there also is a growing practice in Ontario where
6 people may be buying one article and in the process of
7 that give a chattel mortgage on everything they own.

8 MR. SEDGWICK: That's what I had in
9 mind.

10 MR. IRWIN: How is this to be covered
11 or how can you--

12 MR. ZIEGEL: It hasn't been dealt
13 with in any Canadian legislation so far. It is dealt
14 with in many American State Acts. They prohibit it.
15 As a matter of fact the Commercial Court, Article 9,
16 has a clause in it which restricts mortgages granted
17 by consumers to the goods actually purchased at the
18 time or to goods acquired by the consumer within, I think,
19 a 30 day period following the initial agreement. They
20 have very much set their faces against these all-in
21 mortgage agreements for a long time and I think that
22 is the right approach.

23 MR. MACDONALD: Is there any apparent
24 explanation for shying away from this in Canada?

25 MR. ZIEGEL: No, I think perhaps our
26 companies haven't been quite as ruthless in exploiting
27 every legal avenue open to them as companies elsewhere.
28 I think it's fair to say that often companies behave
29 quite reasonably -- there are some exceptions -- but I
30 think by and large they are conscious of their public

1 image, I think they are increasingly conscious and
2 especially the small loans companies because they are
3 licensed. I think this is the great value of a
4 licensing system, that you have some official sitting
5 somewhere who knows what is going on so that he is the --
6 if the necessity should arise, he can take appropriate
7 action. A licence system does not mean that you have
8 a bureaucratic official sitting at your doorstep every
9 week. It means nothing of the sort. It simply means
10 that in extreme circumstances, I may say very rare
11 circumstances, action can be taken. For example, as
12 far as I am aware, no small loan licences have been
13 cancelled against the wishes of a holder since the Act
14 was adopted in 1939. On the other hand, what a licence
15 system does do is that the kind of man who tends to
16 deal in the margin between the legal and illegal spheres
17 tends to shy away from a field where too much publicity
18 is focused upon his activities. And of course applying
19 for a licence does immediately expose him to a certain
20 amount of scrutiny.

21 MR. LAWRENCE: A very able statement
22 of why we need to licence used car dealers.

23 THE CHAIRMAN: Any other questions?
24 Would you care to carry on?

25 MR. REILLY: Mr. Chairman, I'd like to
26 hear the rest of the brief and if it is his intention to
27 carry through, I'd rather --

28 THE CHAIRMAN: Yes, all right. Do you
29 have something you wish to ask?

30 MR. REILLY: I'll wait until you conclude

1 the brief, if you are going to read it.

2 MR. ZIEGEL: Well, I was thinking
3 about the time factor.

4 MR. REILLY: There is only ten pages,
5 I think, as far as the United States and Canada is
6 concerned --

7 MR. ZIEGEL: Very well, I'll start on
8 page 16, Mr. Chairman.

9 The United States appears, on the
10 whole, to have reacted more slowly than the Canadian
11 provinces to the need for buyer protection in conditional
12 sales; thus, at the time when the National Conference of
13 Commissioners on Uniform Conditional Sales Act in 1918,
14 only a handful of state acts safeguarded the buyer's equity
15 in the goods after they had been repossessed. The
16 American Uniform Act, however, was more solicitous of
17 the buyer's rights than the Canadian Uniform Acts of
18 1922 and 1955. Like the Canadian acts, the American
19 Act sought principally to protect the buyer by
20 "sedulously" guarding his equity of redemption, but,
21 unlike the Canadian Act, it did so much more carefully.
22 The American act's superiority lay in that (i) it com-
23 pelled the seller, after repossessing, to sell the
24 goods for the buyer's benefit if the buyer had paid more
25 than fifty per cent of the purchase price or if he
26 demanded a resale, and (ii) it required any sale on
27 behalf of the buyer to be made within thirty days of
28 repossession or after receipt of the buyer's demand.
29 If the time limit was not observed, the buyer was freed
30 of all further obligations. Moreover, the act, as

1 judicially interpreted, entitled the buyer to re-instate
2 the contract on paying the instalments in arrears without
3 regard to any acceleration clause. This was a most
4 important safeguard. Unfortunately, however, the
5 American Act was caught between the end of one period in
6 instalment selling and the beginning of another. It
7 could not therefore anticipate the new problems which
8 the era of mass-produced automobiles and the rise of the
9 finance company would bring with them, and it was left
10 to the later so-called retail instalment sales acts
11 to deal with them. The uniform act has now been replaced
12 by Article 9 of the Uniform Commercial Code, Part V of
13 which re-enacts most of the above features in the
14 earlier act.

15 I might add, in parenthesis, Mr.
16 Chairman, the Bill which the Committee on Personal
17 Property Security has been drafting has dealt with all
18 of these provisions in Part V of the American Code.

19 The early years of the depression
20 intensified the abuses which had begun to make their
21 appearance even before then. Indiana and Wisconsin
22 initiated the first of many official state inquiries into
23 instalment sales practices, the first in 1934 and the
24 second a year later. Both reports found many abuses and
25 made recommendations for legislative action, which were
26 substantially adopted in the Indiana and Wisconsin Acts
27 of 1935. In the same year, a dozen other bills to
28 regulate retail instalment sales were introduced in other
29 states, but none survived. The Indiana and Wisconsin
30 acts and most of the proposed bills had the following

1 features in common: (i) they required detailed dis-
2 closure in the contract of the agreement's financial
3 terms; (ii) they either regulated, or authorized a
4 government agency to regulate maximum permissible
5 finance charges; (iii) they required the licensing
6 of dealers and sales finance companies and they
7 empowered designated agencies to investigate a
8 licensee's business, to hold hearing, and to revoke
9 licences for breaches of the act and other misdemeanors.

10 In spite of the continuing need for
11 regulation, only five states had retail instalment
12 sales legislation of any kind at the outbreak of the
13 Second World War. By 1950, the number had grown to
14 twelve, and in the next seven years was increased by
15 four. 1957, however, was a watershed year: in that
16 year no less than nine states and one territory enacted
17 protective legislation for the first time. The numbers
18 continued to grow: as of June, 1960 thirty-one states
19 had a motor vehicles retail instalment sales law and
20 eighteen an "all goods" law. Moreover, many of the
21 earlier acts have been revised and enlarged.

22 I might add, what you do not have in
23 many American states, Mr. Chairman, is -- you have two
24 acts. One affords a minimum of protection to all buyers
25 -- business buyers as well as consumers; the other an
26 act specifically designed to protect consumers.

27 The common denominator of the postwar
28 legislation, as of the bills and acts of 1935, is found
29 in the compulsory disclosure requirements. Most of the
30 acts also regulate finance charges (including refinancing

1 and delinquency charges) and the buyer's right to a
2 rebate in the case of prepayment. Only fourteen, however,
3 contain licensing provisions in 1958. Apart from these
4 prominent landmarks, there exist wide differences in
5 both the coverage and the contents of the acts.

6 The trend, however, appears to be in
7 favour of comprehensive legislation, as may be seen
8 from New York's example. New York adopted the uniform
9 conditional act in 1922; thereafter, apart from some
10 procedural changes, it added no further substantive
11 legislation until 1941. In that year a limited
12 "disclosure" bill was enacted. Abuses continued to
13 abound, and in 1947 a Joint Legislative Committee on
14 Instalment Financing was established to inquire into
15 existing practices with a view to recommending
16 appropriate remedial legislation. The Committee
17 submitted an Interim Report in 1948 and its Final
18 Report in 1949.

19 Legislative action of any kind,
20 however, was postponed until 1956. In that year, a
21 licensing law and a motor vehicles retail instalment
22 sales act which included provisions for maximum finance
23 charges were adopted. Both acts were repeatedly amended
24 in subsequent years. In 1957, moreover, a general retail
25 instalment sales act applicable to all consumer goods
26 other than motor vehicles, and including all credit
27 sales whether secured or not, was adopted. Governor
28 Averell Harriman also appointed a Consumer Counsel in
29 1955 to guide the legislation. He further recommended
30 the establishment of a permanent agency devoted to the

1 task of consumer education and protection.

2 I think I can leave out the rest of
3 that page, Mr. Chairman, because it deals with bills
4 under consideration in the United States rather than
5 legislation which has already been established. I may
6 perhaps be permitted to continue with England, page 20.

7 MR LAWRENCE: Before you leave that,
8 has this Douglas Bill passed?

9 MR. ZIEGEL: Not so far. I think it
10 overcame one important hurdle this year when the
11 Senate decided to give it further consideration.

12 MR. LAWRENCE: So it isn't dead, eh?

13 MR. ZIEGEL: No, no, it's still an
14 essay, as the Loyalists would say.

15 Consumer credit in the United
16 Kingdom is now running at about one thousand million
17 pounds annually. Almost all of this assumes the
18 form of hire-purchase credit, with a small percentage
19 being accounted for by credit sales, that is, outright
20 sales in which the seller retains no title to the goods
21 but the purchase price is payable in instalments over an
22 agreed period. Revolving charge accounts and similar
23 consumer credit schemes have so far not been introduced,
24 and consumer loans by agencies other than banks appear
25 to be of insignificant size.

26 Although a hire-purchase agreement dif-
27 fers in form from a conditional sale agreement, in
28 substnace it is the same. The hire-purchase form of
29 agreement was first adopted in the 1890's in order to
30 circumvent certain restrictive provisions in the Factors

1 Act of 1889 and the Sale of Goods Act of 1893 (both of
2 which acts have also been adopted in Ontario), and
3 what makes it significant is the fact that this form of
4 agreement is widely in use throughout the Commonwealth,
5 and for the same reasons. In fact, Mr. Chairman, Canada
6 and New Zealand are the only two countries I know of
7 in the Commonwealth that use conditional sales agreements
8 rather than purchase agreements.

9 In a hire-purchase agreement the
10 "hirer" hires the goods from their owner and, apart from
11 an initial payment, agrees to pay a prescribed rental
12 so long as he retains the goods. He is free, however, to
13 terminate the agreement at any time. When the rentals
14 paid plus the initial payment reach a sum which, in a
15 conditional sale agreement, would be equivalent to the
16 "time-price" of the goods the hirer is entitled to
17 exercise an option to purchase the goods outright for a
18 nominal sum. To deter the hirer from terminating the
19 agreement prematurely, a so-called "minimum payment"
20 clause is usually inserted, which is designed to serve
21 the same function as a deficiency clause in a
22 conditional sale agreement, but in the past it has been
23 much more arbitrarily drawn and has given rise to many
24 abuses.

25 Apart from the special problems created
26 by the anomalous nature of the hire-purchase agreement,
27 the problems encountered in instalment sales in England
28 have been substantially the same as in North America.
29 Nevertheless, until 1938, when the first Hire-Purchase
30 Act was adopted, hire-purchase agreements and credit sales

1 were not subject to any statutory regulation. The aim
2 of the Act was to eliminate the following then major
3 abuses in hire-purchase trading: (i) "the snatch back",
4 that is, firms who were more interested in repossessing
5 goods than in being paid for them; (ii) "linked-on"
6 or "add-on" agreements; (iii) extortionate claims under
7 the minimum payment clause; (iv) the failure of
8 agreements to specify the cash price of the goods; and
9 (v) exclusionary clauses precluding hirers from complain-
10 ing about defective goods. The Act deals with these
11 problems in the following manner. It protects the
12 hirer's "equity" in the goods by requiring the owner
13 to apply to the court for leave to repossess the goods
14 where more than one-third of the hire-purchase price
15 has been paid. Upon such an application the court is
16 given a discretion to grant the order without reservation,
17 or to allow it and postpone its operation upon terms,
18 the terms being that the hirer will pay the balance
19 of the hire-purchase price at such times and in such
20 amounts as the court thinks just having regard to the
21 means of the hirer. As a further alternative, an order
22 may be made for the specific delivery of a part of the
23 goods to the owner and the transfer to the hirer of the
24 owner's title to the remainder of the goods. In practice
25 it is an order of the second kind which is usually made.
26 Thus the English court, like the Alberta court, is given
27 power to adjust the financial terms of the agreement --
28 a most important power where the hirer has fallen upon
29 hard times or where the court feels that the vendor has
30 behaved unconscionably. "Add-on" agreements were made

1 largely ineffective, and the injustices of the minimum
2 payment clause were partially, and somewhat crudely,
3 reduced by the provision that, where the hirer has
4 voluntarily terminated the agreement, the owner is only
5 entitled to recover the difference between one-half
6 of the hire-purchase price and the sums already paid.
7 Mandatory disclosure requirements, along familiar
8 North American lines, were designed to eliminate the
9 third abuse, while exclusionary clauses involving
10 warranties and conditions are outlawed for all practical
11 purposes by section 12 of the Act.

12 I might add a word on this problem of
13 exclusionary clauses, Mr. Chairman. Personally, I see
14 much exercise over them. It seems to me that finance
15 companies who deal with reputable dealers have nothing
16 to fear from statutory provisions that outlaw such
17 clauses because if a suit does arise between the buyer
18 and seller -- they don't arise frequently where you are
19 dealing with a reputable company -- then the finance
20 company can always go to the retailer to take the
21 contract back and adjust his differences with the buyer.
22 I think the real effect of such legislation dealing
23 with exclusionary clauses is to make finance companies
24 more careful about the dealers with whom they do
25 business.

26 Since 1938 three further acts have
27 been added to the statute book. We are still dealing
28 with England. They are the Hire-Purchase Act of 1954,
29 the Advertisements (Hire-Purchase) Act, 1957 and the
30 Hire-Purchase Act of 1964. That was passed this summer

1 and comes in force the 1st of January, 1965.

2 The first of these measures raised the
3 financial ceiling of the 1938 Act to 1,000 pounds in the
4 case of livestock and 300 pounds in all other cases.
5 The 1957 Act was passed with a view to removing wide-
6 spread abuses in advertising practices -- the type of
7 advertisement that said, for example, "Yours for only
8 1 pound down", without specifying the cash price, the
9 hire-purchase price, or the number of weekly or
10 monthly instalments. The Act, as amended by the 1964
11 Act, now requires any advertisement which purports to
12 contain details of payments in respect of any goods to
13 include the following information: (i) the amount
14 of the deposit, or a statement that no deposit is
15 payable; (ii) the amount of each instalment directly
16 expressed; (iii) the total number of instalments
17 payable; (iv) the length of the period in respect of
18 which each instalment is payable; (v) the number of
19 instalments which are payable before delivery of the
20 goods; and (vi) the cash price and the hire-purchase
21 price of the goods. Moreover, no undue prominence may
22 be given to any part of the required information as
23 compared to any other part. This last provision was
24 of course designed to prevent a trader from emphasizing
25 the sugar coating at the expense of the underlying pill.

26 The Hire-Purchase Act, 1964, was
27 introduced with a view to implementing the recommendations
28 concerning consumer credit contained in the Molony
29 Report on Consumer Protection which was published in
30 1962. The Act is long and complex, and many of its

1 provisions merely amend the earlier acts. Among the new
2 provisions the following may be mentioned. First, the
3 financial ceiling of the 1938 Act has now been raised
4 to 2,000 pounds for all types of goods, but for the
5 first time incorporated companies are excluded entirely
6 from the protection of the act. Secondly, the hirer or
7 buyer is now entitled to receive immediately a copy
8 of any agreement or offer signed by him. Previously
9 the dealer had seven days within which to provide the
10 buyer with a copy. Thirdly, where a sale or hire-
11 purchase agreement is concluded or an offer is signed
12 by a hirer or buyer at a place other than trade premises
13 the hirer or buyer is entitled to cancel the agreement
14 at any time up to four days following the service upon
15 him of a statutory copy of the agreement. This provision
16 was designed to deal with the abuses of door-to-door sales.
17 (In passing it may be noted, Mr. Chairman, that
18 Saskatchewan also has a Commercial Agents Act which
19 provides for the licensing of itinerant salesmen, but
20 does not confer any general right of cancellation on
21 the householder.)

22 Finally, the Act seeks to protect
23 private purchasers of vehicles which are subject to
24 undisclosed hire-purchase agreements by providing that
25 the hirer under such an agreement shall be deemed to be
26 the owner of the vehicle for the purpose of passing a
27 good titel to the private purchaser. The United Kingdom
28 has no system of public registration for hire-purchase
29 agreements, and the resultant frequency with which un-
30 suspecttive persons found themselves purchasing encumbered

1 automobiles had been causing grave concern. I mention
2 this feature of the 1964 Act because I know that the
3 Ontario position is equally unsatisfactory.

4 It will be noted from the foregoing
5 review that finance charges are not regulated in the
6 United Kingdom, nor have any attempts been made so
7 far to compel disclosure of the charge in terms of a
8 percentage rate. These omissions are mainly due to
9 the fact that there has been very little discussion about
10 these problems so far. Dealers' commissions have,
11 however, attracted a great deal of criticism. Minimum
12 down-payments and maximum maturity periods have been
13 regulated on and off since the end of the war under
14 wartime emergency powers, but for economic, not social
15 reasons.

16 In conclusion, I should also say a
17 word about the Consumers Council which was established
18 in March, 1963, pursuant to another recommendation of
19 the Molony Committee. The Council consists of a
20 chairman and ten members and is supported by a
21 full-time director and a staff of thirty employees,
22 which includes a lawyer and an economist. The Council
23 received a grant-in-aid of 60,000 pounds in 1963/4 and
24 125,000 pounds for the current fiscal year. The terms
25 of reference of the Council are wide, and during its
26 first year of operations the Council has explored and
27 recommended legislative action on a wide variety of
28 consumer problems. (I have supplied Mr. Harcourt with
29 a copy of the Council's first annual report. I believe
30 he has run off some Xerox copies so the Committee might

1 take a look at it.) I mention all this because it has
2 for some time now become apparent that consumer affairs
3 can no longer be dealt with in an ad hoc and fragmentary
4 fashion but require the same continuous attention as
5 any other activity of major public concern.

6 Australia is very short. Perhaps
7 I may just read the next page.

8 Consumer credit plays an important
9 part in the Australian economy, and now amounts annually
10 to well over a billion dollars. As in the case of the
11 United Kingdom, most of this assumes the form of
12 hire-purchase credit.

13 Hire-purchase legislation in the
14 Commonwealth began in 1931, and by 1959 all the states
15 had some kind of act on the subject. The measures,
16 however, differed widely in content. In 1959,
17 representatives of the states drafted a uniform hire-
18 purchase bill, and this has now been enacted in all the
19 states. The bill is comprehensive in character and
20 has provisions on each of the six heads of subject
21 matter adumbrated at the beginning of this brief. Several
22 of the Australian provisions deserve special mention:
23 (a) the Bill does not impose maximum finance charges
24 (although some of the states have separate provisions
25 to this effect) but empowers a court to re-open a
26 transaction at any time and to reduce any finance
27 charge which it deems unconscionably high. The effect
28 of this provision is to extend to consumer sales the
29 powers which the Australian courts (and the Ontario
30 courts, too, under the Ontario Unconscionable Transactions

1 Relief Act) already possessed with respect to direct
2 loans. (b) The Bill entitles the hirer to a rebate
3 in the finance charge both where he voluntarily
4 prepays the outstanding balance and where the owner
5 terminates the contract. (c) The Bill prohibits the
6 payment of commissions to dealers, save where the dealer
7 guarantees performance of the hirer's obligations. In
8 such an event, the commission may not exceed 10 per cent
9 of the finance charge.

10 I wonder, Mr. Chairman, if I might
11 now proceed with my Addendum? Starting at page 31 of
12 the brief.

13 Fair-minded persons will agree that
14 the consumer should be in a position to compare the
15 finance charges of different retail outlets and
16 financial agencies, just as he can compare the price
17 of any other commodity, and that the simplest -- if
18 not, indeed, the only effective -- way in which this
19 end can be accomplished is to require the finance charge
20 to be stated in terms of a percentage rate. If these
21 premises are granted, then convincing reasons would
22 have to be shown why such a requirement should not be
23 adopted by the legislature. Several such reasons have
24 been advanced, and I should like to comment on them
25 briefly. Before embarking on this task, however, a
26 number of preliminary comments may be helpful.

27 First, the disclosure problem is
28 growing in urgency because of the increasing number of
29 outlets offering consumer credit and the lack of uni-
30 formity among them in the statement of their financial

1 charges. Thus if the consumer wishes to finance the
2 acquisition of an automobile, he can either borrow the
3 money from a bank, a small loans company or a credit
4 union, or he can purchase the car on conditional sales
5 terms from an automobile dealer. But each of these
6 outlets states its finance charge in a different way,
7 so that the consumer has no ready way of ascertaining
8 which of them offers him the cheapest form of credit.
9 Moreover, units of the same type of financial agency
10 may state their charge in different ways. The chartered
11 banks, for example, state their charge for consumer
12 loans in four different ways, namely, as an "add-on"
13 charge, as a "discount" charge, as a simple rate of
14 interest coupled with certain additional charges, and as
15 a simple rate of interest with the loan being
16 repayable by the "Morris Plan" method. (I appreciate,
17 of course, that banks and small loan companies are
18 subject to federal control, and this indicates the
19 desirability of federal-provincial cooperation in this
20 area).

21 Secondly, it is quite understandable
22 that the business community should be opposed to such a
23 disclosure law, nor are some of their arguments devoid
24 of merit. Most laws which change the status quo are
25 opposed by a section of the community. But this, of
26 course, is not the end of the matter, for if it were
27 no legislation which did not win unanimous approval could
28 ever be adopted. There is here a conflict of interests
29 (though I think the conflict is more apparent than real)
30 between two important sectors of the community, and as is

1 so often the case in such conflicts the legislature has
2 to make a judgment as to which of the two interests is
3 the more important -- the right of the consumer to know
4 or the desirability of not complicating commercial
5 transactions.

6 Thirdly, voluntary disclosure of the
7 percentage rate is already made in some highly signifi-
8 cant cases, namely, by small loans companies in the
9 case of small loans and by such large retail chain
10 stores as the T. Eaton Co. in respect of revolving
11 charge accounts.

12 Mr. Chairman, the members of the
13 Committee will find some copies of these agreements
14 at the end of my brief where I reproduce the typical
15 agreement used by the Household Finance Corporation for
16 its small loans. Household Finance is, of course, the
17 largest small loans company in Canada by far. I think
18 the annual volume of their business is something like
19 400 million dollars. Members of the Committee will
20 note, Mr. Chairman, that right in the middle of the
21 agreement is set forth the charge as in terms of a
22 percentage. 2% per month for any part of the unpaid
23 principal balance not exceeding \$300.00, 1% per month
24 or 12% per annum for any part exceeding \$300.00 and
25 1/2 of 1% or 6% annually on any remainder thereof.
26 Then turning to the Eaton's revolving credit agreement,
27 members of the Committee will note in paragraph 2 it
28 sets out the percentage charge -- paragraph 2 of the
29 Eaton agreement -- "the buyer agrees that the Company
30 shall debit my said account with a monthly service charge

1 until further notice to me, of $1\frac{1}{2}\%$ of the balance at
2 the end of the previous month.

3 MR. LAWRENCE: May I ask, is this
4 in the form of provincial legislation?

5 MR. ZIEGEL: No, sir, it is not
6 required by any Act; that is true also of the Small
7 Loans Act, so far as I -- I checked the Small Loans
8 Act again because I notice that in the Committee's
9 Interim Report to the Legislature that some reference
10 to disclosure requirements in the Small Loans Act was made.
11 But I checked the Act again, as well as the regulations
12 made under the Act, and I could find no provision in
13 the Small Loans Act which requires a statement of the
14 charge in percentage terms.

15 MR. MACDONALD: Well I remember one
16 of them, for example, went on a certain charge at the
17 end of each month, a dollar charge, and then at a
18 certain level they switch to a percentage charge.

19 MR. SEDGWICK: That was Eaton's.

20 MR. ZIEGEL: But I might add that the
21 T. Eaton Company is not the only one that operates on
22 a percentage basis. I understand the Hudson's Bay
23 Company does.

24 MR. SEDGWICK: Yes, they said so to
25 us. They operate --

26 MR. ZIEGEL: The only thing is the
27 agreements they issue don't actually state a fixed
28 percentage charge, they simply say the buyer agrees
29 to pay such a percentage charge which shall be fixed
30 by the Company from time to time.

1 MR. MACDONALD: I'm curious to know
2 why a Company like Eaton's is operating all across the
3 country with variations that aren't required by law.
4 This must be an unnecessary administrative complication.

5 MR. ZIEGEL: I should have thought so.
6 It may be psychological. I'm merely speculating.

7 MR. IRWIN: Mr. Chairman, perhaps in
8 private session with the Committee I can report upon
9 my meetings with the Eaton Company which might clarify
10 some of these points.

11 THE CHAIRMAN: Perhaps on Wednesday
12 we can do that.

13 MR. ZIEGEL: If I might continue
14 now, Mr. Chairman. I'm in the middle of my second
15 paragraph, page 32.

16 It is not correct, therefore,
17 to suggest, as is often done, that the disclosure prin-
18 ciple is a novel one in Canada. It is true that the
19 small loans contracts state the finance charge in
20 terms of a "step" rate, but this appears to be so
21 because the Small Loans Act itself sets the maximum
22 permissible rates in this way.

23 Finally, in my opinion, full disclosure
24 of the financial aspects of a consumer credit transaction
25 will enhance the reputation of consumer credit agencies
26 and increase public confidence in their integrity.
27 Indirectly, therefore, the proposed law is itself in
28 the best interests of the business community. This has
29 been the experience in other fields, such as securities
30 and company law legislation, where legal reforms were at

1 first vigorously opposed but have now been accepted as
2 normal and necessary measures for the protection of
3 the public.

4 I should now like to deal with the
5 objections which have been raised against the proposed
6 law:

7 (a) That it is misleading to describe
8 a finance or carrying charge as
"interest".

9 This appears to be largely a matter of semantics. How
10 the percentage rate is described is not important. What
11 is important is that the finance charge be expressed as
12 a percentage on the declining unpaid balance of the debt.
13 The problem of how to describe the percentage rate
14 has created no difficulties for such companies as the
15 Household Finance Corporation or the T. Eaton Co. The
16 small loans contract of the former describes the
17 percentage charge as representing "the total cost of the
18 loan".

19 I'd like to say a little bit more
20 about this, Mr. Chairman. What they call the "agreed
21 rate of cost of loan, including interest".

22 The revolving credit plan agreement
23 of the T. Eaton Company provides "that the company
24 shall debit my account with a monthly service charge,
25 until further notice to me, of 1-1/2% of the balance
26 at the end of the previous month".

27 Both descriptions are equally satis-
28 factory.

29 (b) That where credit is being ex-
30 tended for only a small amount,
the percentage rate will be high

1 and the consumer will draw erroneous
2 conclusions as to the profit made by
the credit agency.

3 The answer to this argument is twofold. In the first
4 place, the apprehensions as to the consumer's reaction
5 are probably unfounded. Neither the small loan companies
6 or the large retail chain stores have suffered a loss
7 of business as a result of stating their charges in
8 percentage terms. Secondly, it is a question of educating
9 the consumer. He should learn to appreciate (if he
10 does not already do so) that consumer credit is
11 considerably more expensive than other forms of credit.
12 To the extent that disclosure of the percentage rate will
13 bring home to the consumer this fact, this can only be
14 regarded as a gain.

15 (c) That there are various ways of
16 calculating the percentage rate,
and that each of them gives a
17 different result.

18 The legislation can indicate which of the several
19 available formulae shall be used. The Alberta Act,
20 for example, empowers the Lieutenant Governor in Council
21 to prescribe the appropriate formula.

22 It seems to me, Mr. Chairman, this is
23 probably one of the weakest objections that is generally
24 raised against a disclosure law.

25 (d) That it would take a small
26 retailer a disproportionate amount
27 of time to work out the correct
percentage in each case, and that
he could easily make a mistake.

28 Now my answer to this objection is, tables of calculation
29 are now generally in use by retailers and could just
30 as easily be prepared for use under the new legislation.

1 The legislation could also provide that any percentage
2 figure taken from a table whose contents have been
3 approved by the Superintendent of Insurance or some
4 other designated official, shall be deemed to be
5 correct and in conformity with the Act. The Act
6 could further provide, as does the English legislation
7 with respect to breaches under the Hire-Purchase Acts,
8 that where the breach is inadvertent and the consumer
9 has not been prejudiced by it, the court may waive an
10 otherwise applicable penalty.

11 (e) That it would encourage retailers
12 to bury some of the cost of credit
13 in the cash price of the goods, so
as to show a more favourable
percentage figure.

14 I might add this is an objection which has only been
15 raised fairly late in the day, Mr. Chairman. I
16 think the gentleman who first raised this particular
17 objection was Professor Johnston in his monograph on
18 the disclosure problem. I think if you examine all
19 the briefs that were filed with the Statutes Committee
20 down in the States and the Kroll Committee up here,
21 none of them refer to this as an objection. It seems
22 to me it is a bit of an afterthought.

23 The dangers of this happening on any
24 extensive scale are entirely a matter of speculation.
25 In any event the device would only be successful if all
26 the merchants in a given trade followed suit. If they
27 did not, consumers would notice the difference in cash
28 price and favour the merchant with the lower price with
29 their custom. The argument is also revealing because
30 it tacitly admits that under the existing methods of

1 stating finance charges, the consumer cannot readily
2 compare one finance charge with another. The reasoning
3 which underlies this objection is also inconsistent
4 with objection (f) below.

5 (f) That the consumer is not rate
6 conscious.

7 This is undoubtedly true of a substantial number of
8 consumers (though by no means all, as the increasing
9 resort to bank credit shows), but the conclusion which
10 the opponents to the disclosure law seek to draw from
11 the premise does not follow. The consumer is not rate
12 conscious because he has not learned to appreciate the
13 importance of the subject and because the present
14 diversity of methods in stating finance charges
15 effectively deters him from trying to make comparisons.
16 Most consumers also sign contracts without reading
17 or understanding their contents, yet one would not argue
18 that this is any justification for society acquiescing
19 in the presence of unfair clauses in such contracts.

20 (g) That it is impossible to calculate
21 the percentage rate in the case of
22 revolving charge accounts where
23 the amount outstanding at any
24 particular time is unpredictable
25 and may fluctuate from month to
26 month.

27 Two systems of calculating the charges on such accounts
28 appear to be in use at the present time. The large
29 retail stores, such as the T. Eaton Co. and the Hudson's
30 Bay Co., apply a uniform rate of charge, regardless of
the amount outstanding at any time. They obviously create
no problem. Other stores, on the other hand, state
their carrying charges in dollars and cents and the

1 charge does not bear a constant ratio to the amount
2 outstanding. This method does create a problem for the
3 legislature. The problem could, however, be resolved
4 by permitting such stores to state the percentage rate
5 in terms of a monthly rate of the amount outstanding at
6 the beginning of each preceding month, calculated to the
7 nearest 1/4 of 1%. The stores which presently use the
8 second method would of course always be free to adopt
9 a uniform percentage rate. (In passing, I may point
10 out that I understand from the credit managers of two
11 very large stores which already use the percentage
12 method that it takes their staff only a few hours each
13 month to make the necessary calculations. The use
14 of modern calculating machines apparently reduces the
15 work almost to a formality).

16 That, Mr. Chairman, concludes the
17 formal presentation of my brief. I would be very
18 glad to answer any questions.

19 THE CHAIRMAN: Before we have any
20 questions we will take a five minute recess and
21 then we will resume with the questions.
22 SHORT RECESS.

23 Professor Ziegel has concluded his
24 formal brief and we will now proceed with any questions
25 members of the Committee or Mr. Sedgwick and Mr. Irwin
26 may have. Starting with Mr. Sedgwick --

27 MR. SEDGWICK: Mr. Chairman and Mr.
28 Ziegel, I am not competent to ask any critical questions
29 about your brief, but if I may speak very personally
30 I think it is the most useful and most interesting
brief that has been presented to this Committee. It is

1 the most useful one that I have heard. I just have one
2 comment and I make it in case any members of the
3 Committee wanted to check with the English legislation
4 on page 22 where you speak of section 12 of the
5 English Act, as I know you know, it is section 8 of the
6 1938 Act as amended by section 12 of the 1964 Act
7 which, I believe, doesn't come into force until
8 January of 1965, is that not correct?

9 MR. ZIEGEL: That's correct.

10 MR. SEDGWICK: Yes, and I just mention
11 this in passing -- at the bottom of page 23 where you
12 speak of disclosure in terms of a percentage rate,
13 when I was in England I had an interesting chat with
14 Mr. Molony, the author of the Molony Report and
15 apparently they did discuss and consider it, but
16 they didn't adopt anything, I assume because there
17 was opposition from finance company interests; it has
18 been considered though nothing is reflected in the
19 Molony Report or in the drafted statute.

20 I have nothing else to say, sir,
21 except to repeat that I think it is one of the most
22 studious briefs that has been presented to this Committee.

23 MR. IRWIN: Mr. Chairman, I guess the
24 first thing I would like to say is welcome, Mr. Ziegel,
25 because he is the first friend I have had in this
26 Committee.

27 On July the 29th I made a statement
28 to the Committee after some study arguing for statement
29 of charges as a percentage rate and on September the
30 14th I prepared this memorandum which I have filed with

1 the Committee today. So all I can say is that I
2 heartily agree with everything you have said in these
3 statements.

4 There is one thing, though,
5 it has been brought out that the T. Eaton Company in
6 Ontario does not apparently follow the practice of
7 the T. Eaton Company in Saskatchewan. I have had
8 some private meetings with the Company following their
9 appearance here and many of the apparent difficulties
10 and objections that appear on the surface are
11 essentially solvable. I can't say any more than that
12 right now.

13 The other comment I would
14 make -- on page 34 of the Addendum, I believe there
15 are some difficulties, very minor ones, about causing
16 lenders to calculate and declare a rate of interest
17 and they are mainly arithmetic. Some of the comments
18 that have been made before the Committee in regard
19 to the possible inaccuracies of the calculations,
20 you find, on analysis, that they are talking about
21 inaccuracies running to the seventh or eighth place
22 of decimals. Now if you are going to be that refined
23 about the whole thing then what they say is true.
24 But in my study of the matter, I have made the
25 assumption that a tolerance for error of $1/8$ th of 1%
26 would be accepted and if you do that you are working to
27 within one point of decimals and I should think if
28 that degree of tolerance were permitted, accuracy could
29 be obtained. This is just an alternative suggestion
30 for the way you have treated that problem. I'm basically

for it where the courts recognize a margin of error.

On page 35 -- I don't wish to protest anything -- I think the revolving credit problem is perhaps greater than you indicate here. The major problem, even where they are using a percentage rate, on the previous month's balance according to your submission or your illustration of the revolving credit plan, it says, item 2, "that the Company shall debit my said account with a monthly service charge, until further notice to me, of $1\frac{1}{2}\%$ of the balance at the end of the previous month". I have found, in actual fact, that this method nonetheless can result in significantly different effective rates than the monthly rate charge. It may be necessary to adopt a somewhat more practical approach dealing with revolving credit than with all other forms of lending of any type. It isn't quite as easy, except on page 36, where you refer to the use of modern calculating machines; if -- and this is quite a distinct possibility within a reasonable length of time -- say two years -- that if the revolving credit accounts were handled by an electronic computer, that in fact the actual monthly stated rate could be calculated from day to day and the presently existing wide fluctuations in the effective rate due to the initiative exercised by the buyer -- that is, he can charge what he wants when he wants and pay what he wants when he wants -- the buyer, having this initiative can himself write his own contract and sometimes very adversely to themselves as far as the effective rate is

1 concerned. But until the advent of electronic computers,
2 even with the use of the most sophisticated electric
3 equipment or machines, it would place the burden, I
4 think, on the retailer to make exact calculations
5 with daily changes in the accounts. So there is a bit
6 of a problem there. But with regard to everything else
7 I welcome your analysis of the thing. Because it
8 is so close to my own I want to emphasize it was
9 made entirely without me.

10 MR. MACDONALD: Can we have Mr.
11 Ziegel's comments on the revolving account?

12 MR. ZIEGEL: Yes. Well, let me say
13 at this moment, Mr. Chairman -- I'm not, of course,
14 a mathematician as far as difficulty is concerned,
15 and I appreciate also, of course, there are some
16 technical problems that have to be ironed out, as
17 Mr. Irwin has mentioned, once the legislation has
18 been agreed to in principle that a disclosure law
19 should be adopted. This doesn't frighten me at all.
20 It seems to me that once this decision has been
21 accepted in principle to adopt a disclosure law, then
22 you get together and agree on the precise technical
23 formulation for the law. They could agree on the
24 precise formula to use, they could agree on whether
25 tables can be given recognition, they could agree also
26 on other ways in which the retailer's work could be
27 reduced to a minimum.

28 As far as the revolving credit
29 problem is concerned I must confess I didn't entirely
30 follow Mr. Irwin on the difference between the monthly

percentage charge and the effective rate. I appreciate, of course, that the consumer is entitled to make payments at any time and that insofar as a percentage charge is concerned it is not the same thing as the effective charge. This, it seems to me, is a good example of where the piece of legislation has to be practical and realistic. We are not aiming for the nth degree of mathematical accuracy. We are working for a workable system, and I think if the consumer is informed that on the assumption that a given amount outstanding for a whole month then the rate of interest is so much, that is, I think, as much as the consumer wants and that, I think, is as much as he needs.

Might I add also this, that in the whole spectrum of the disclosure problem the revolving charge problem looms very small. After all, the average amount outstanding in a revolving charge is perhaps \$100.00 with a maximum of about \$200.00. This doesn't create anything like the problems of the purchase of a car on which the outstanding amount may be as much as \$2,000.00 and repayable over a period as long as 36 months. So the only reason why I personally am concerned at all as to whether these disclosure requirements apply to revolving credit accounts is to obtain some sort of consistency. I wouldn't like any part of the commercial community to feel that they are being discriminated against as compared to any other part of the financial community.

MR. IRWIN: The only point, Mr. Ziegel,

1 -- and it is a technical and mathematical problem --
2 it's just that the statement of disclosure of the
3 rate in the case of revolving credit would have to be
4 a qualified statement that this would not apply to
5 any other form of lending.

6 MR. ZIEGEL: I think that would be
7 quite in order. After all we are all acquainted with
8 legislation where broad principles are laid down and
9 then qualified to take account of special circumstances.
10 This is not a new problem.

11 MR. IRWIN: There is just one other
12 area of slight disagreement on my part, Mr. Ziegel.
13 I'm not quarreling with you because 95% of your brief
14 is so much in line with my own views on the thing.

15 In paragraph 23 -- you don't
16 deal at great length with it, but the problem
17 of dealer's commissions -- just to maybe get a reaction
18 -- in business as a public accountant I have a number
19 of clients who enjoy this dealer's commission and
20 oddly enough I can't see anything wrong with it.
21 I suppose the objection to a dealer's commission is
22 that the consumer is paying in the finance charge
23 someone and somebody else is getting the benefit of it,
24 of which the borrower is not aware. And I suppose
25 the inference could be made that if that other person
26 weren't getting a cut the charges could be less. But
27 I feel that if we got to the point of disclosing to
28 the borrower what he was paying then he makes his
29 decision in relation to that statement and what happens
30 to the cut to the dealer is no concern of his. Would

1 you have any comment on that?

2 MR. ZIEGEL: Yes, indeed. I am much
3 in sympathy with much of what you have said, Mr. Irwin.
4 I feel myself that either you have a disclosure law
5 or a maximum charge law and then it is a matter of
6 internal organization how the finance company chooses
7 to allocate that finance charge between itself and
8 the dealer. This is not to say, mind you, that I think
9 payment of high commissions to dealers is a good
10 thing. While I do feel -- provided you adopt one of
11 these two measures and preferably both -- the consumer
12 is getting all the protection he needs and thereafter
13 competitive forces will take care of the commission
14 problem itself as, in fact, it has to some extent
15 already because the competitive entrance of the banks
16 in this field has led several of the major finance
17 companies to reduce very substantially the commissions
18 paid to dealers. This is a direct effect, I think,
19 of the competitive force of bank lending. I would
20 expect this development to increase in the future.

21 THE CHAIRMAN: Mr. Reilly, I believe
22 you have to leave early --

23 MR. REILLY: Yes, thank you very much,
24 Mr. Chairman. In congratulating Professor Ziegel in
25 his presentation, I don't want him to misinterpret
26 my congratulations as complete agreement with everything
27 he says. (Laughter)

28 On page 2, Professor, in the
29 middle of the page, "regulation of such advertisements
30 should also be brought within the disclosure net".

1 Would the suggestion you have in mind be along the
2 same lines of the 1957 Act in England, as you pointed
3 out on page 22?

4 MR. ZIEGEL: Yes, sir.

5 MR. REILLY: That would be the
6 suggestion you might have?

7 MR. ZIEGEL: Yes. May I say that
8 having spent considerable time on and off in England,
9 the 1957 Act seems to work very well. The importance
10 of any legislation in this field is that it treats
11 all phases of this area uniformly. This is, of course,
12 what the Act does, and I think when a merchant feels
13 he is in exactly the same boat as any other merchant,
14 then he has fewer complaints. The difficulties that
15 arise, have arisen in the past, is when one merchant
16 adopts a practice that other merchants don't think too
17 highly of but they follow simply for competitive
18 reasons. This is why I think the 1957 British Act
19 is a good Act. It seems to work extremely well.

20 May I add, of course, the
21 merchant is not obliged to disclose the details of
22 the time price if he doesn't want to. He could,
23 for example, say in his advertisement: "Hire-purchase
24 terms available", and that would be quite proper. But
25 what he may not do under the Act, he cannot say, for
26 example, "Only ten bucks down" and omit details as to
27 the number of payments and the size of the instalments.
28 This is what you might call a rather misleading adver-
29 tisement and you may not do it.

30 MR. REILLY: On page 4, Professor

1 Ziegel, you refer to repossessions, and just so that
2 I will understand, what jurisdiction are you referring
3 to with this 10% -- is that in Canada?

4 MR. ZIEGEL: Yes. For automobiles.

5 MR. REILLY: That's across Canada?

6 MR. ZIEGEL: Well, as I have
7 intimated at the time I read this passage, these
8 figures were given to me three years ago by the
9 then President of the Federated Council of Sales
10 Finance Companies. One of the difficulties, Mr.
11 Chairman, of using statistics in this field is that
12 there are no official statistics and you can only
13 rely on evidence given you by officials in the
14 industry. They are only estimates and sometimes they
15 may be fairly speculative. This is an unfortunate fact
16 and maybe some agency will undertake a full-scale
17 investigation of the fiscal aspect of the industry.

18 MR. REILLY: One question on page 8,
19 Professor Ziegel. You were referring to the prairie
20 provinces and the Farm Implements Act. You made an
21 observation to the effect that their licensing has
22 real bite in their licensing requirements. What way
23 are they different from other jurisdictions?

24 MR. ZIEGEL: I was referring to this,
25 that there is a governmental agency in charge of the
26 enforcing of these Acts and the governmental agency
27 appears to be doing their job. It is not inconceivable,
28 it sometimes happens, you have licensing provisions
29 but there is no government official charged with
30 ensuring that licensees observe the Act. In other words,

1 the Act, for all intents and purposes, becomes a
2 dead letter because, as experienced in the securities
3 field -- I don't think it's a great secret -- that
4 there have been problems in the past where prospectuses
5 have been issued that should never have been issued
6 and they manage to get through because the Securities
7 Commission in that particular Province was not strong
8 enough or perhaps wasn't quite on the ball. This is
9 why I think it is important that if you do adopt
10 licensing provisions that you have departments that
11 are adequately staffed and adequately financed to do
12 the job, otherwise it is not worth bothering with
13 licensing provisions.

14 MR. REILLY: So that actually it's a
15 question of enforcement to which you refer?

16 MR. ZIEGEL: Yes.

17 MR. REILLY: What is the provision
18 you were thinking about as far as Newfoundland is
19 concerned -- you referred to their licensing statute
20 there, which appears to protect the investor rather
21 than the consumer?

22 MR. ZIEGEL: Well simply this, that
23 as you know some of the Provinces have been concerned
24 about a number of finance companies that have solicited
25 deposits from the public and then have become insolvent.
26 Now Ontario dealt with the problem by adopting a
27 Depositor's Act, as they did in England too, and I
28 think that Newfoundland's answer to this problem was
29 simply by requiring the licensing of these companies
30 and also requiring them to file an annual balance sheet

1 with the appointed official so that he could satisfy
2 himself that the companies were in a solvent condition.

3 MR. REILLY: A final question, Mr.
4 Ziegel, in connection with the recommendation of the
5 United States officials that there be a permanent
6 agency -- what is the status of this recommendation
7 now? This would be a permanent agency perhaps to
8 consider consumer credit --

9 MR. ZIEGEL: Well, are you referring
10 to the federal level or the state level?

11 MR. REILLY: I am referring -- on
12 page 19 you say: "He further recommended the
13 establishment of a permanent agency...."

14 MR. ZIEGEL: That was a recommendation
15 of Governor Harriman. In fact a Consumer Council was
16 appointed and operated for a number of years. The
17 last I heard of it her work was taken over by one of
18 the existing government departments, I suspect it
19 may have been for internal reasons. States such
20 as California and Minnesota do have a full-time
21 Consumer Council whose job it is to acquaint themselves
22 with consumer problems, be of assistance to existing
23 government departments. The late President Kennedy
24 also set up an Advisory Council in 1962 which was,
25 however, not a full-time body. I believe they still
26 exist and I imagine it was this American initiative
27 that persuaded the federal government to adopt its
28 Advisory Council this summer. I think the thing about
29 an Advisory Council is it operates in too perfunctory
30 a manner. You must have at least one or two permanent

1 officials whose job it is to concentrate on this one
2 area. Otherwise I think it becomes a little too
3 diluted when no responsibility lies on any one
4 particular person.

5 MR. REILLY: Thank you very much,
6 Professor, and with your courtesy, Mr. Chairman --

7 THE CHAIRMAN: Mr. Whicher, any
8 questions?

9 MR. WHICHER: No, I would just like
10 to reiterate what other people have said. I think
11 this is a very well prepared brief. Whether we
12 agree with it or not doesn't deny the fact that much
13 work has been put into it.

14 One of the things -- I know
15 Mr. Irwin will know far more about this than I will --
16 but from strictly as a layman I can't see some of the
17 things that have been said about the difficulties
18 of making a percentage of interest on revolving credit.
19 I think we can compare it somewhat with bank interest
20 on personal bank deposits. As I understand it, I
21 think the major banks now pay a definite percentage
22 of interest on minimum bank credits over a three months
23 period. It seems to me that if the T. Eaton Company
24 or the Robert Simpson Company wanted to charge 1% per
25 month on the minimum balance or on the maximum balance,
26 whatever it might be, if that balance were described
27 by legislation, whether it be minimum or maximum, in
28 the case of the banks it certainly is the minimum and
29 I might say it is quite possible for a fellow to put
30 two or three thousand dollars in the bank and only be

1 paid on twenty-five dollars. He may have had it
2 there for a couple of months and the depositor in a
3 bank has just as much leeway in depositing as the
4 buyer has in buying from Simpson's or Eaton's, so
5 I think that through legislation it could be laid
6 down whether it should be the maximum or minimum
7 balance, therefore they charge so much, whatever it
8 may be. While on the other hand I am quite willing
9 to admit, Mr. Irwin, in consultation with these large
10 retailers, has probably other objections with which I
11 am not familiar.

12 I must say that I agree with
13 the brief and that someone will have to take the other
14 side in a very capable manner to change my opinion.
15 I respect the fact, of course, that there are always
16 two sides to every question and no doubt we will hear
17 the other side maybe tomorrow or Wednesday.

18 THE CHAIRMAN: Mr. Belanger? Mr. Bukator?

19 MR. BUKATOR: Mr. Chairman, you are
20 going to hear it right now. I'm sorry my friend left
21 because he had to get away early, but it will be on
22 the record that while he doesn't agree entirely with
23 the brief but only partly with it, I agree 100% with
24 it and that's the best you have got today. This I
25 have been advocating for quite some time. I think it
26 can be done. I think you can reveal the true interest
27 rate in percentage and I do believe that these tables
28 can be worked out. I have a very simple one sent to
29 me from a finance company in the States and all you have
30 to do is set it at the unpaid balance, bring your slide

1 out to the \$200.00 mark indicating a monthly dollar
2 payment and the interest rate that you pay. Now all
3 I want the people of the Province to know is how much
4 they are paying by way of percentage rate. You have
5 now minimized the objections in such a way that I
6 am going to use this now for my Bible for the rest
7 of the meetings from now on in, Mr. Chairman, until
8 we quit. There is no objection that can't be
9 overcome, it is not insurmountable. I want to
10 compliment you most sincerely, because this is what
11 this Committee has been looking for. Now, as someone
12 said, there are two sides -- I'm very biased, and I
13 don't see where the other side is.

14 THE CHAIRMAN: Thank you, Mr. Bukator.
15 Mr. Lawrence:

16 MR. LAWRENCE: Dealing with the
17 American experience, I don't think you indicated --
18 perhaps I missed it -- in their disclosure legislation,
19 what number of States have got it down to the point
20 where they require disclosure?

21 MR. ZIEGEL: I think I did mention
22 it, as far as I know it's none so far.

23 MR. LAWRENCE: None at all?

24 MR. ZIEGEL: You see, the disclosure
25 problem, true, has been discussed in the United States
26 for several years just as a result of the Depression,
27 but it didn't become a matter of active legislative
28 interest until Senator Douglas brought his Bill up
29 in the Senate and I think this is where the fight has
30 centered, because they see this Bill, if it were adopted,

1 it would effect a large percentage of all credit sales
2 in the United States, even though it only purported
3 to cover interstate sales. It indirectly would cover
4 a very large proportion of all sales.

5 MR. LAWRENCE: Even assuming that
6 if we did come to the conclusion that disclosure in
7 percentage terms might be put into a Bill, then we
8 get down to the argument as to whether they should be
9 on a monthly basis or an annual basis. What is your
10 opinion on this?

11 MR. ZIEGEL: Well, I would be quite
12 happy with a monthly statement. The only difficulties
13 I see about it are of a technical nature. Let's say
14 your annual rate of interest works out at $6\frac{1}{2}\%$, how
15 are you going to divide it into 12? You are going to
16 get some factions of 1% and not a very neat looking
17 fraction either. I'm afraid that might encourage
18 some companies simply to round off annual figures,
19 usually by raising them to higher figures than they
20 would otherwise charge. Maybe therefore you might
21 decide to distinguish between the amount involved. I
22 can well see that if the amount involved is small --
23 say anything less than \$300.00 -- that a monthly
24 figure would be quite acceptable, particularly where
25 charge accounts and revolving credit accounts are
26 concerned. On the other hand, you might feel that
27 where larger amounts are involved, where indeed you
28 are much closer to the size of an ordinary bank loan,
29 that there is no reason why the charge wouldn't be
30 expressed in terms of an annual charge.

1 MR. LAWRENCE: And do you feel that
2 this would be largely ineffective without (rest of
3 sentence inaudible)

4 MR. ZIEGEL: No, I don't think so,
5 not at any rate until the federal government starts
6 to step into the field and there is not much sign
7 of that. As far as should advertising be regulated,
8 I am, of course, expressing a social value. I think
9 that consumer credit, used wisely, has great benefits
10 to the average consumer. Certainly nothing that I have
11 said today was intended to throw discredit on consumer
12 credit or discourage its use. On the other hand,
13 I would like to see it used wisely and not abuses.
14 I think it is capable of abuse and I think it is being
15 abused in some areas. I think one of the areas is
16 in respect of advertising. I think from the community's
17 point of view I think it's fairly bad if people of
18 very limited means should be encouraged to overextend
19 themselves by these somewhat misleading advertisements.
20 And I think, therefore, that an Act of the English
21 kind -- although it might possibly change some of
22 the existing advertising practices, would do nothing
23 but good in the long run.

24 THE CHAIRMAN: Mr. MacDonald, do
25 you have any questions?

26 MR. MACDONALD: Well, I would comment
27 on one question, Mr. Chairman. We have had up until
28 now a pretty formidable parade of witnesses presenting
29 to us the extreme difficulties in coming to grips
30 with this view without straightjacketing the merchandizing

1 field, without bringing the economy grinding to a halt,
2 claiming that you couldn't have salesmen calculating
3 interest rates when in fact we discovered later in
4 testimony that most of them, at least with their
5 head offices, were operating on tables and things
6 of this nature. I think this testimony today is in
7 the nature of -- Mr. Ziegel has come to bat in the
8 6th or 7th inning and has hit a home run with the
9 bases loaded. We are balanced out now. I think we
10 have cleared through a lot of these propaganda argu-
11 ments -- and as far as I am concerned they are
12 propaganda arguments -- I think they have been
13 demolished and we can see more clearly the kind of
14 thing that is feasible if for no other reason than
15 in fragmentary fashion it has been attempted and
16 operated in varying degrees in many other jurisdictions.

17 I have just one question that
18 I am a bit curious about. What is the explanation for
19 the fact that New Brunswick ran into what appears to
20 be insurmountable administrative difficulties in an
21 Act that apparently was patterned after Quebec, and
22 Quebec has gone on since, very effectively.

23 MR. ZIEGEL: I think it is the old
24 argument. I think they adopted these minimum down-
25 payment provisions without providing for some appropriate
26 department to enforce them. And I think this is a very
27 common difficulty. I think it explains also why
28 Manitoba hastily withdrew the first version of its
29 disclosure bill. I am speaking, of course, on a very
30 confidential basis. It does happen from time to time

1 that, through public pressure, a Legislature thinks
2 it a good idea to have an Act on some subject and then
3 adopts it without perhaps giving it as much
4 consideration as it needs. And then you find after
5 you have adopted the Act that all kinds of difficulties
6 for which you haven't provided and which you have to
7 deal with and of course that puts you in a difficult
8 position and the whole Bill is discredited and the
9 government ends up by agreeing to change the whole Bill.
10 This is precisely what happened in Manitoba's case. As
11 far as I know there were no hearings before the Bill
12 was adopted and no briefs were received. The Bill was
13 very poorly drafted from a lawyer's point of view, it
14 was highly ambiguous and didn't define such important
15 things as the meaning of interest. Of course the
16 business community was quick to point it out in
17 addition to their usual opposition to the Bill, until
18 the government was very much on the defensive and
19 in the long run they merely gave up the whole fight
20 and deleted the interest disclosure requirement from
21 the Bill.

22 MR. MACDONALD: One other question,
23 Mr. Chairman. In your references to Consumer Councils,
24 cil and sel, do you see a Consumer Council as being
25 able to play an effective role at the provincial level,
26 or federal level, or both? Or what?

27 MR. ZIEGEL: I think they could
28 operate successfully at both levels although personally
29 I would like to see a federal-provincial Council
30 because this is an area where responsibility is

1 apportioned between the two levels of government, it
2 is an area that has very little political content,
3 it is an area where cooperative federalism could
4 work very well. In any event I think some government
5 Department or some official charged with consumer
6 affairs is very necessary.

7 MR. MACDONALD: I'd like to get a
8 clear picture of the functions of the Counsel - s-e-l-;
9 the counsel is presumably setting the whole field and
10 making recommendations, the consumer counsel. Is this
11 a person who acts in a general sense as a lawyer on
12 behalf of the public, or what?

13 MR. ZIEGEL: Yes, on behalf of the
14 public, indeed, but he's not very concerned with
15 legal disputes. I think counsel, an American counsel,
16 indicates anybody who is concerned to give advice in
17 a general sense, just as we talk about an investor's
18 counsel. And I think a counsel with an "s" very
19 basically fills the same function as a council with
20 a "c", except there aren't so many people doing it.

21 MR. MACDONALD: He might even be
22 a full-time personnel of the Council?

23 MR. ZIEGEL: Well, you could have.
24 As I mentioned in terms of the British Council, with
25 a "c" they do have a full-time Director who, in effect,
26 plays the same part as a counsel would do in the
27 States.

28 THE CHAIRMAN: Mr. Oliver?

29 MR. OLIVER: I haven't anything,
30 Mr. Chairman. This states very well in supporting the

1 point of view that I hold and I don't have anything
2 further to add.

3 THE CHAIRMAN: Mr. Kerr, do you
4 have a question?

5 MR. KERR: I was just wondering,
6 Mr. Chairman, you mention, sir, on page 34, some of
7 the questions that have been raised by the seller or
8 the lender, there are various ways of calculating
9 percentage rates to get a specific result. Your
10 answer is very short. I was just wondering if there
11 is more to this objection than that?

12 MR. ZIEGEL: No. In fact this is
13 one of the weakest objections that can be raised.
14 Nobody has ever denied that there are three different
15 formulas, have been as many as four, nobody denies
16 either that they give different results. The only
17 question is whether this problem can be solved. I
18 say that it can easily be solved if the Act lays down
19 which particular formula shall be followed.

20 MR. KERR: This is mathematically
21 sound, is it?

22 MR. ZIEGEL: Yes. I think the
23 constant ratio formula, for example, or the actuarial
24 method is --

25 MR. IRWIN: The direct ratio method
26 is most accurate.

27 MR. ZIEGEL: Right.

28 MR. KERR: The sample conditional
29 sales contract that you have -- I notice it has the
30 promissory note attached. There is an interest rate

1 charged after the maturity?

2 MR. ZIEGEL: Yes.

3 MR. KERR: This would indicate that
4 some of these finance companies feel that it's difficult
5 to charge an interest rate, or show an interest rate,
6 as a number of dispersed payments, or a total of
7 dispersed payments, but after maturity it is a simple
8 thing. For example, Household Finance does this, they
9 charge interest rates on the amount of money that is
10 being borrowed. I think you will agree that there is
11 a difference between the functions of Household
12 Finance, for example, and IAC. One is primarily in
13 the business of lending money and the other is,-- I
14 hope you think there is a difference, maybe you don't, --

15 MR. ZIEGEL: No. I'm glad you
16 raised this point. From the point of view of an
17 economist, as I understand it, there is no essential
18 difference in the functions. If you want to borrow
19 money to buy a car, you can either go to a bank or
20 a small loans company and borrow that money or you
21 can purchase the car on a conditional sales contract.
22 Now the economist says in either case the purchaser
23 is getting the use of somebody else's money for the
24 agreed period. Now whether he is getting the use of
25 the bank's money or the small loans company's money
26 or the dealer's money or the sales finance company, it
27 doesn't matter, he is still getting the use of somebody
28 else's money and the economist calls the use of that
29 money "credit". It's only in point of law that we
30 distinguish between these various forms of credit. We

1 call one a finance charge and the other one interest.
2 To the economist this doesn't make sense at all
3 because he is concerned with the charge in each
4 case should be denominated by the same terminology.

5 MR. KERR: I think the finance
6 companies --

7 MR. ZIEGEL: May I just add one
8 word? In order to draw a valid functional distinction
9 you could speak, let's say, between purchase money
10 credit and other forms of credit. Purchase money
11 credit means title credit used to acquire new
12 goods whereas the other type of credit money might
13 serve different purposes.

14 MR. KERR: I was just wondering if
15 the whole contract, the conditional sales contract,
16 for example, that includes insurance charges and
17 certain other recording fees and things like this,
18 and then also has -- some of these companies have --
19 what they call a merit plan where you pay off some
20 months before maturity -- that still wouldn't complicate
21 the idea of showing the interest rate charged?

22 MR. ZIEGEL: No. In my opinion it
23 would not. There are two points I could have added
24 to my brief. One is historical. The reason why many
25 of these finance companies and retailers state the
26 finance charge the way they do is quite accidental.
27 They did it initially because they were anxious not
28 to become involved in interest legislation. This is
29 certainly true down in the States where interests have
30 been closely regulated for a long time. Now when

1 instalment sales first became common they wanted to
2 make sure that their charges did not become subject
3 to their usury laws. This is why they computed the
4 charge in terms of an add-on charge, not because there
5 was some technical difficulty about stating it as
6 an interest rate.

7 Secondly, any retailer and
8 any finance company which has a sizeable operation
9 already have to use a percentage method in computing
10 its dollar and cents charges. They must know what
11 kind of return they want to get on their money and
12 when they work that out they add-on their basic
13 operating cost, fixed cost, and add the two together.
14 So that, in effect, already the finance company has
15 to compute, initially, part of its charges in terms
16 of an interest rate and convert it to a dollar and
17 cents rate and then it adds on its fixed operating
18 cost.

19 MR. EDWARDS: Mr. Chairman, I would
20 just like to make the statement -- I think we all know
21 we don't get anything for nothing -- and I don't see
22 any reason why the interest charges can't be on a
23 percentage basis.

24 THE CHAIRMAN: Anything else, Mr.
25 Edwards? Mr. Rowe, do you have any questions?

26 MR. ROWE: I'd just like to compliment
27 Professor Ziegel on the comprehensive brief as well.
28 He has sort of summed up our difficulties here on
29 the Committee even to the objections and some of the
30 answers to them too. It looks as though the answer to

1 objection (g) on the Addendum may be subject to
2 solution if our friend here, our mathematical wizard,
3 can get a percentage. Objection (a), however, as you
4 state, is a matter of speculation where this business
5 of competition, and high advertising, and certainly
6 we are subject to high advertising, pressure adver-
7 tising, can conceivably tend to drive the true cost
8 underground. Think of the price of suits for one.
9 You look at a rack of suits and I defy anyone to say
10 that that suit should sell for 57.50 or 59.50 --
11 anything could be hidden there. The same with
12 chesterfields and many, many other items. Each
13 dealer has dozens and dozens of different specifications
14 and prices. You can go from one dealer to another
15 with a list of the various specifications but it would
16 be quite a job to fully compare. So that therein, I
17 think, is one of the big problems -- but you pointed
18 it out very well there. You feel that the high pressure
19 advertising which is part of our modern life is apt
20 to drive these true costs of credit underground and
21 leave the buyer just as confused as ever?

22 MR. ZIEGEL: I'd say it is factually
23 clear. I know in England they have had one or two
24 cases where this happened. A furniture company had
25 for some time been advertising 5% rates -- these were
26 flat rates -- but they only represent a very small
27 percentage of the total retail sales. I have not
28 noticed that it has made any difference in their
29 business one way or the other. I might add, however,
30 that the recent English 1964 Act prohibits the stating

1 of charges as a flat percentage but requires them to
2 be stated as an effective rate. Let's say if you
3 advertise finance charges of 5% you would be penalized
4 if the 5% represents the flat charge and not the
5 effective rate. This too may stop some of this attempt
6 to mislead the consumer.

7 THE CHAIRMAN: Anything else, Mr.
8 Rowe? Mr. Irwin?

9 MR. IRWIN: I just thought I would
10 make this comment to Mr. Rowe's question. It's
11 rather interesting to find this argument advanced,
12 and Mr. Ziegel put it very well; I think this is
13 something that has been added to the ammunition of
14 the opponents of disclosure, a kind of reaching after-
15 thought. The interesting thing from my observation,
16 as a businessman or an advisor to businessmen, is
17 that under the present arrangement whereby the price
18 is stated as one thing and finance charges are not
19 usually stated but turn out to be something at the
20 time that the contract is signed, that the transfer
21 of costs -- these people make a great point of the
22 transfer of the finance charges to the price. The
23 fact of the matter is on a wholesale scale the transfer
24 of the price of the article is now being transferred
25 to the finance charge. And on a substantial scale -- so
26 that they are, in practice, defeating their own
27 argument -- that transfer should not take place. In
28 fact it is taking place now on a very wholesale scale.
29 In other words, the price is being reduced and the
30 recovery is being made in the finance charge, so how

1 anybody can advance this as an objection I can't
2 possibly imagine.

3 THE CHAIRMAN: Are there any other
4 questions, gentlemen?

5 MR. LAWRENCE: Are you going to or
6 have you made a submission to the House of Commons?

7 MR. ZIEGEL: I haven't so far.
8 Frankly I don't know what the status of that Committee
9 is at the moment.

10 THE CHAIRMAN: We hope later to
11 have a joint meeting with them to discuss these
12 problems that you have outlined here today, and hope
13 that we can come to some common --

14 MR. ZIEGEL: There is a lot of
15 additional problems, Mr. Chairman, if I may add a
16 word, with the constitutional position now, because
17 as I read the decision of the Supreme Court in the
18 Bothwick case, it seems to say it all depends on how
19 you state your finance charge. If it is stated in
20 terms of a percentage rate, as a lawyer understands
21 interest, then it would come within federal regulation.
22 If, however, it is stated some other way, then it
23 falls under provincial regulations. This is a very
24 difficult situation. This matter, I know, was given
25 some consideration by Senator Kroll's Committee --
26 one of the grounds for opposition to the Bill has
27 been the constitutional grounds and the Clerk to
28 this Senate expressed his opinion that it would be
29 constitutional for the federal government to legislate
30 the matter, but he seems to be relying heavily on the

1 federal government's criminal law apart from any power
2 it might have under the interest clause, section 91
3 of the BNA Act. As I say, it is a difficult area
4 and I think it would be a brave lawyer who was to
5 be dogmatic. But I think this might fairly be said
6 that it's difficult to see how a mere provincial
7 law requiring the statement of finance charges as
8 a percentage rate could or would necessarily be regarded
9 as a law which regulates interest. There is a difference
10 between requiring disclosure of something and
11 regulating something.

12 MR. SEDGWICK: We might not be able
13 to say, "You cannot charge more than 20%". But we may
14 be able -- I agree with you, I think we are able --
15 to say "You can charge anything you like as long as
16 you tell them what it is".

17 MR. LAWRENCE: That would come under
18 the Unconscionable Act.

19 MR. SEDGWICK: Within the field, of
20 course, but at the moment I think that's the position
21 on our legislation at the present moment.

22 MR. LAWRENCE: (Inaudible)

23 MR. SEDGWICK: Do you think we could
24 say to the banks that you must make this disclosure?

25 MR. ZIEGEL: There are one or two
26 Privy Council decisions which seem to say that the
27 banks, the federal banking powers, are extremely wide,
28 but it does say banks and banking --

29 MR. SEDGWICK: Mr. Lawrence is
30 right then that if we pass legislation that applies,

1 shall we say, to Household Finance, they are compelled
2 to say that they charge 2% per month and yet the
3 banks can still say they charge 6% although they
4 charge 10.

5 MR. ZIEGEL: Certainly I agree
6 entirely this is a field -- perhaps there is none
7 better -- where the opportunity is ripe for federal-
8 provincial cooperation.

9 MR. MACDONALD: But, keeping the
10 banks apart, if our objection to this for disclosure--
11 this could be judged under the Unconscionable Trans-
12 actions Act -- perhaps placing the powers of the
13 Provinces in a stronger position than even the
14 federal government -- they are dealing with the totality
15 of the whole thing.

16 MR. SEDGWICK: I don't think -- (rest
17 of sentence lost in change of belts)

18 MR. ZIEGEL: I don't think there would
19 be anything in the Unconscionable Transactions Relief
20 Act that would --

21 MR. MACDONALD: No, I said the banks
22 apart -- apart from the banks. We are dealing with
23 the totality.

24 MR. SEDGWICK: Yes, except the point
25 that is made -- Mr. Lawrence has made it -- is that
26 it would be unfair if we are to compel lender A
27 to state accurately his interest rate and have no power
28 to compel lender B, a big lender indeed, the banks,
29 to state theirs. Unless there were complimentary
30 legislation.

1 MR. ZIEGEL: Of course it is true
2 to say that there are many areas in which a provincial
3 government cannot legislate. I don't think this is
4 a sufficient argument to prevent legislation in areas
5 in which it does have jurisdiction. One often
6 acts as a governizing agent for Acts in the other.
7 And I think now that the Bank Act is due for revision
8 next year, this question of requiring banks to
9 state their finance charges as an effective interest
10 rate may well be raised. I think it should. I'm
11 very much concerned that such reputable agencies
12 as the banks have to state their finance charges
13 in four different ways -- I think it is most unfortunate
14 and I'm sure there is not one consumer in a hundred
15 that appreciates the different methods being used
16 by the banks.

17 Of course there is good
18 reason why they, in part, have to behave the way they
19 do and that is because of the 6% ceiling in the Act.
20 I think it is most unfortunate they have to use these
21 devious ways.

22 MR. SEDGWICK: Well I've always
23 thought that banks and banking was our chief consti-
24 tutional problem, not interest, Mr. Lawrence. Let's
25 confine ourselves to disclosure.

26 MR. LAWRENCE: (Inaudible)

27 MR. SEDGWICK: Well, that's a federal
28 matter which we don't deal with.

29 MR. ZIEGEL: You mean raising the
30 jurisdiction to \$5,000.00, or something like that?

1 Certainly I think a good case can be made out for that.

2 You mean so that it would also cover things like
3 second mortgages?

4 MR. LAWRENCE: Yes.

5 MR. ZIEGEL: Certainly. In fact
6 I think some of the American Acts do go to limits
7 beyond \$1,500.00. In any event many of the American
8 Acts have general usury laws which regulate the
9 maximum rates of interest.

10 MR. SEDGWICK: They are State laws?

11 MR. ZIEGEL: Yes.

12 MR. SEDGWICK: We would have no
13 power to pass any State laws.

14 MR. ZIEGEL: Indeed not, but I am
15 saying there is precedence -- practically every State
16 has general usury legislation and they discriminate
17 between different types of agencies. I agree
18 entirely, Mr. Lawrence, that a strong case may be
19 made out that all consumer loans, say, up to \$5,000.00
20 shall be subject to a statutory maximum.

21 MR. KERR: Do you think if the Bank
22 Act was changed there would be much objection to
23 disclosure?

24 MR. ZIEGEL: On the part of the
25 banks? I can't actually see that it should. They
26 are not charging exorbitant rates. The maximum they
27 charge even now comes out to about 11.2% per annum.
28 I don't see why they should be afraid of saying this.

29 MR. SEDGWICK: I don't think they
30 are -- it's just the rule of the 6% ceiling.

1 MR. KERR: It makes it tough on the
2 finance companies.

3 MR. SEDGWICK: That's what I had
4 in mind. That 6% that the banks say they charge and
5 it isn't so and then you look at Household Finance
6 document here, you see, which conforms to the Small
7 Loans Act, so the comparison-minded shopper is
8 likely to say: "My God, I can get it for 6% at the
9 bank and I have to pay 1% a month here" -- and that
10 isn't true. He's paying 1% a month at the bank but
11 the bank restrictions -- which I am sure they don't
12 welcome -- tell them to put it that way, as Professor
13 Ziegel says.

14 THE CHAIRMAN: Anything else,
15 gentlemen?

16 Well, Professor Ziegel, you
17 have come quite a long distance to be with us today.
18 I don't think if we were looking back and planning
19 our work you could have come at a better time. There
20 certainly have been some foggy areas in our thinking
21 and I think your brief has done a lot to disclose some
22 of those areas which we were not too clear on. We
23 certainly appreciate your coming and, as has already
24 been said, this is one of the finest briefs we have
25 had and I would like to say we are very grateful to
26 you and thank you.

27 This meeting is adjourned,
28 gentlemen until ten o'clock tomorrow morning

3 1761 11467542 4
